

PINK AND REDS CATCH THE MARKET

LITCHI, the sweet fruit with fabulous aroma and mind-blowing colourful texture has hit the market with its short yearly stint. Several varieties including the most popular Bedana and China-3 is now available while the Bombai is likely to take over from the first week of June. The northern districts grow almost 80 percent of the litchis in the country. The farmers of the region are now busy harvesting in a festive atmosphere. The delicious fruit is unfortunately out of reach of many due to high price.
