

A FAIR FOR TREE LOVERS

PLANT at least one sapling of wood, fruits and herbal trees at available places to protect environment and bio-diversity as well. With this slogan the three-month long National Tree Fair kick off beside Bangabandhu International Conference Center on June 01. With the participation of 86 nurseries from in and around the city NTF has so far attracted thousands of tree lovers. Last year the fair sold over 2 crore plants. The participants are sure to exceed the number this year. Various species of fruit plants, medicinal plants, flower seeds and ornamental plants are this year's attractions. While green elements are rapidly being wiped out of the city's landscape this fair has brought a ray of hope in recovering the city's verdant spots.
