

## DHAKA ROAD WOES

**M**ANY roads in the capital are in a mess owing to careless digging by several utility service providers. The excavation work in the rainy season has made those roads unsafe, with trenches at many places not being covered properly. Without warning signs, many motorists and vehicles get stuck in the soft soil and mud every day or just fall into deep pot-holes. Again, the long-running construction of flyovers has left the roads in a bigger mess. There are precious few signs that the work will be finished anytime soon. All these problems, compounded by waterlogging, have made city dwellers' lives a misery. The photos were taken in Sayedabad, Jatrabari, Mohakhali, Tejgaon, Malibagh, Dayaganj and Joykali Mandir areas recently.
