

A SAGA OF NEGLIGENCE

LIFE has never been easy for thousands of underprivileged children in Bangladesh. Many of them rifle through garbage to earn their livelihood, while others are involved in more hazardous jobs like recycling of lead acid battery and operating and maintaining power-driven machinery. Many end up working as underage domestic helps. Some of those underprivileged kids spend a day being filled with joy on Friday as the Shishu Academy arranged a programme only for them. Other photos were taken in Motijheel, Tejgaon and Gendaria areas.
