

Life and Struggles by the River Padma

FAYZA HAQ

Alliance Francaise recently showed an impressive collection of Sumon Yusuf's work. There is a total of a year's work in the black and white panoramas of the Padma. He has been doing photography for fourteen years. This is his first solo, although he has done many group exhibitions. They were a part of exhibits by different organisations such as BRAC, Alliance Francaise etc. The family, at first, did not encourage it, as it meant wandering on the roads and streets, from pace to place. He has studied Visual Literacy in the Philippines Manila University (2013, September). And at "Patshala" under Dr Shahidul Alam (2004-5) Sumon has done a diploma course there in 2005. He has done English Literature from Darul Ehsan University (2007-11). Bespectacled and under 32, he is always full of knowledge and smiles.

Natural resources are essential for basic survival developed for peace, prosperity and security. History, mythology, religion, art and human civilization are around the rivers and oceans. Peace,
