Ferry service on road leading to Kuakata disturbed

Ferryboat, pontoon lie damaged for months

OUR CORRESPONDENT, Patuakhali

Ferry service at Mohipur on Patuakhali-Kuakata road is badly disturbed as water enters through several leaks of the ferry and the pontoon set up on the north side of the river.

Workers have been engaged to remove the water with power pumps to continue the ferry service on the road leading to Kuakata tourist spot.

"We have to remove water

from inside the ferry and the pontoon three to four times a day as water enters through leaks on the bottom and sides.

The problem has continued for six months," Md Salim, a worker of the ferry, said during this correspondent's visit there on Saturday.

"Water enters in huge quantity when the ferry is fully loaded. Now we carry only two buses or trucks on the ferry at a time although

its usual capacity is four to five large sized vehicles," he said.

"Due to the situation, we have to wait for hours to cross the river as 200 to 300 vehicles including private cars, buses, and trucks daily use the route," said Abdul Mannan, a bus driver on Patuakhali-Kuakata road.

Md Jahirul Islam, executive engineer of Roads and Highways Department (RHD), said they sent several letters to the authori-

ties concerned to supply a new ferry for the route but in vain.

Now steps have been taken to replace the damaged ferry by an old ferry from Lebukhali to solve the problem, he said.

Abul Fazal Malik, executive engineer of the Ferry Division of RHD, said, "We have already sent the body of a ferry to Mohipur and it will run on the route after machine of the running ferry is shifted to it."
