

## Talk of the town

# Pori Moni

It doesn't take a fortune teller to predict that Pori Moni is heading towards massive stardom. None of her films have been released yet and she is already the talk of the town. She has already acted in a dozen films with various different stars, all of which are still pending release. To add icing to her credentials, she has also acted in a movie with Bangladeshi superstar Shakib Khan in the film "Dhumketu". Soon after filming, she got signed to work with Shakib Khan again in another film by Wajed Ali Shumon called "Juboraaj". Also, her debut film, "Pagol Diwana" will be released this April.

## SOHANA'S *sixth outing*

Sohana Saba will star in the upcoming film by Murad Parvez called "Dour". Filming for the movie begins this March. This film will mark her 6th film to date since she began working for the industry. That's impressive in its own right, but for this new film, she really is venturing to new territories. She will not only be starring in the film but she is also its executive producer. We all hope this film turns out great and her success streak keeps going.

Riaz is coming back to the silver screen with a new film by Wajed Ali Shumon called "Sweetheart". Starring opposite him will be the beautiful Bidha Sinha Mim. Shooting for the film has already begun and last we heard, he was shooting for the film in Bangkok. Most of the shooting that will take place there will be for the songs that will feature in the movie. This marks his first film after his long hiatus from the film world. When asked about it, he said that the film scenario wasn't really very ideal for a while, so he took his leave. Now that things have improved, he has rejoined the film industry and hopefully this will end the current shortage of heroes in the film industry.
