

ARMEEN MUSA

Popular for fusion music, experimenting with sounds and remakes, Armeen Musa is finally back with yet another set of easy-to-listen melodies in 'Simultaneously.' Bringing together elements from different cultures, the album portrays diversity, unity and affection.

Armeen shares her thoughts regarding water conservation, food and music.

What are the three things you would take with you to a deserted island?

Piano, taanpura and a journal.

If you were given a chance to sing in any hall / venue in the world, where would you do so?

Woodstock or any huge open air venue.

What is your favourite midnight snack?

Grilled cheese sandwiches.

How do you feel after singing a fresh, new song?

Usually very inspired and excited

How do you conserve / save water at home?

I try to use the taps as less as possible- especially try not to waste when washing.

How many glasses of water do you drink everyday and why?

I try to drink at least 6 -8 glasses, it's great for digestion, important for weight loss and keeps my skin clear and my energy refreshed.
