# Best burgers in town

The idea of a good burger, even a while back, was just a simple kebab stuffed in a bun with some tomato sauce and lettuce. That scenario, however, has changed drastically and now you will find fantastic offers coming in from food outlets with precise focus on making the perfect burger. From gigantic sized to multi-floored, towering burgers and everything else in between, here's the top pick of the best burger joints in town.

## AMERICAN BURGER

This chain food outlet can be credited with bringing out the first of the seriously focused and of course, seriously tasty burgers to our plates. Their style of cooking the patties used in the burger very closely resembles the way burgers are supposed to be cooked. Plus their addition of cheese, mayo, lettuce and other dressings help give the burgers some delicious flavours and just add to the juicy taste of the grill style patties. Another great plus point of American Burger is their reasonable prices.

## WOW BURGER

This brand may have had humble beginnings in a cart, but the demand they generated, through their delicious offerings, soon led to a proper brick and mortar store. The burgers offered there are quite different from one another due to the ingredients and toppings and so on, which ensures that each burger has a unique taste. An example of this unique taste is their mushroom

down a bit since their early days, but they are still going strong.

The burgers have this deep-grilled, juicy taste that is just truly hard to describe and the other dressings just enhance that juicy grill taste tenfold. The prices are quite agreeable and they also have student discount facilities, which is a great bonus for the students who regularly visit

like no other. The patty is a bit on the drier side, but in all honesty, their garlic sauce and their special 'naga' taste makes up for it. The prices are very agreeable and the Gulshan 2 signal location means it's always a busy spot.

## PREETOM

This is the burger that's on quite literally everyone's mouth right now. While it may be a bit pricey considering the quantity, especially compared to some of its competitors, this is still the burger to beat in terms of pure taste. Sufficiently juicy with a good helping of cheese and a deliciously cooked patty means it is a taste you won't forget too soon and would keep coming back for more and ensures that you are getting the absolute top tier of burgers you can get your hands on.

## MONSTER FOODS

This may be the newest kid on the block, but you will be hard pressed to find anyone who can really complain about this place. As the name suggests, the proportions of the burgers they serve are truly monstrous, meaning eating these is a whole different challenge. Their grilled patties are absolutely delicious and each offers up a unique taste. What's really great about this place though is the fact that you can truly customise the burger the way you want with a selection of toppings. This means you can create some truly unique palate pleasers. Price is also another wonderful thing about this place as it's very reasonable for the quantity that they serve.

topping option, which adds so much that you can't keep them all in check while devouring it. Also for the price, their burgers give a good amount of quantity as well so it's a win-win for everyone.

## LIVE KITCHEN

Having started business a few years back, they gained almost instant popularity through the sheer number of check-ins given by customers on Facebook. Their burgers and the pictures of their burgers were so tempting that people were flocking in to have a taste. The hype may have died

the shop.

## NAGA INC.

This cart is dedicated to all those who hunger for the spiciest burger around. The name truly does justice to the food it serves as these burgers are the spiciest on offer anywhere! They have a three tier basis in terms of spice with a low, medium and high spice. For the truly insane and iron bellied, they also have a super spice on offer designed to burn your mouth with the equivalent heat of a small sun. Make sure to have an extinguisher next to you because these things offer up spice
