

SPECIAL FEATURE

MOUSHUMI and Nargis after 15 years

Moushumi was considered one of the top a-list actresses of the silver screen and that title is still pretty much valid to all cinema goers. Having achieved many awards and nominations for her performances throughout her long and illustrious career, she is now directing films as well as acting. Her latest directorial film, called "Shunno Hridoy" is currently being filmed. Seems she has now been contracted to do some modeling work for new TV Commercial, which is really her strong suit because that's how she came to be known to her audiences in the first place. Another special thing about this TV Commercial is that she will be working alongside Nargis Akhter after 15 years.

SANI is back

Omar Sani is the kind of actor who can bring any character to life. What's even more stunning is the fact that he can make the best of any situation that comes up. When he first started in the industry, his lean figure made him look the part and he was cast for protagonist roles exclusively and was quite the famous actor. After a while, he gained some weight, which would have put other actors out to pasture but not him. His new physique granted him a villainous look and was therefore cast as antagonists for that period. Now though, after losing some weight, he is now back to his original protagonist castings and now actively participating in the film industry.

Mim Into Film

Bidya Sinha Mim first came to the spotlight through the Lux Channel i Superstar pageant. Ever since then, we have seen her in almost every visual medium and she has been a very successful actor, mostly specializing in TV Dramas. Now though, she seems to have taken a more active interest in the film industry. Her latest upcoming film, "Poddo Patar Jol" has just finished shooting. The director is Tonmoy Tanshen and acting alongside her is actor Emon. Another film she is doing is called "Sweetheart" which is also currently in production. Acting alongside her in this film is Reaz.
