This new unique collection is the perfect blend of playfulness, fun and spontaneity, with its delectable scents serving as the perfect flirtatious weapon for every woman.

Lux has established a tradition of working with the world's best perfumers. To carry on the tradition, Deepika teamed up with master perfumer Alessandra Vinksnaitis to create this new limited edition fragrance - designed to spark the playful act of flirting. Deepika chose her favourite perfume to create the Star Collection, with the fragrance's playful notes capturing the essence of her flirtatious style. Lux lovers will now get a chance to step into Deepika's shoes and flirt like her too.

When I was making the perfume for the Lux Star Collection line, I wanted to create a fragrance which would bring out the inner star in every woman and remind her of how fabulous she can be. I thought of a young lady, very feminine and full of self-confidence, certain that she has an inner star that is able to shine and charm everyone around her.
