## Global SIM card

You are on a hectic business trip bound to cover over eight different countries within just 15 days. You stay in one country for hardly a day or two. Nonetheless, you need to be in constant touch with people back home and at your office. What happens is, every time you step into a new country, the first thing you do is get yourself a new SIM card which is operable only in that particular country. Needless to say, this is inconvenient and takes your invaluable time and energy.

So how about this solution? There is a WOWtel SIM card now in Bangladesh that can be used in more than 215 countries around the world! This SIM card also allows you to roam around the world with free incoming calls in many of the countries and cheaper calls.

And users can always use their SIM card to access and make the most of the internet as they travel across the globe.

## Wear your shades

Direct exposure to sunlight for prolonged periods, and that also on a regular basis, can prove to be very fatal — and not just for your skin. While you apply sunscreen lotion and carry an umbrella, you also must not forget about our eyes.

Meanwhile, sunglasses are a fantastic fashion accessory. If that is not enough of an excuse, sunglasses can play an important role in keeping your eyes healthy. Your shades can protect your eyes from harmful UV rays, hence discouraging cataracts to form. UV light may contribute to damaging the macula lutea — an area of the eye with numerous light-sensing cells, which allow for seeing minute details vividly — perhaps eventually leading to blurriness and vision loss. Up to 10% of all skin cancers are found on the eyelids.

And of course, they allow for easier vision under the blazing sun. So flaunt those sunglasses in style!
