You can centre the wall with a wallpaper and have borders with a paint of the same colour tone as the wall paper.

Or you can use the wallpaper on the entire focal wall and highlight it with spot lights and paintings, framed photographs or mirrors. Instead of a wall paper, you can use paint with a textured brushing technique, stencilling, asymmetrical patterns or stripes. The design possibilities are limitless when it comes to wallpapers and paints!

MAINTENANCE AND COST

As our weather is very humid, it is a must that wallpaper is only cleaned with a feathered duster or a dry cloth. A thin layer of plywood can be installed before pasting a wallpaper to prevent damaging the wall if it is peeled off later. The longevity of wallpaper ranges from three to five years. Comparatively paints are easier to maintain and last longer. However, wallpapers offer a myriad of prints, such as stripes, flowers, polkas and oriental designs in all colours and metallic shades, which can be used to bring in a unique and loving touch to your home.

Give your home a new look by using wallpaper and paint. Wallpapers are available in stores along the Mohakhali flyover. There are mostly Chinese and Korean wallpapers priced from Tk. 1800-5000 for a 52 square feet piece. Paints from different companies are easily available in local markets. Usually a litre of paint is enough to paint a wall, and it will cost you approximately Tk. 1000-1500.
