Pabna. Day and night temperatures may remain nearly unchanged over the country. The sun sets in the capital today at 6:45pm and rises tomorrow at 05:10am. Country's highest temperature 38.7 degree Celsius was recorded yesterday in Chuadanga and lowest 24.3 in Syedpur.

### Stabbed patient dies after being sent home Family claims DMCH

negligence STAFF CORRESPONDENT

A patient with stab injuries, who was said to be well enough to be taken home by on-duty doctors of Dhaka Medical College Hospital, died from excessive bleeding at his residence in Kadamtali of the capital.

The deceased was Mamun Fakir, 20, a worker of a local metal melting factory.

Mamun was rushed to DMCH after he was stabbed by muggers on his hips around 10:30pm Monday.

His family members alleged that the doctors at the emergency unit released him instead of admitting him, saying Mamum was okay.

"The doctors gave him blood, closed the wounds and asked us to come back to the hospital after 14 days to remove the stitches," the victim's brother-in-law Jakir Hossain told The Daily Star.

"Soon after we took him home around 5:00am, Mamun began bleeding," said Abdur Razzak Fakir, Mamun's father. When Mamun was rushed

back to DMCH around 7:30am, he was declared dead. Morgue sources said he died from blood loss. "We repeatedly requested

the on-duty doctors to admit Mamun, but they refused to admit him," Jakir alleged. He added that Mamun died due to the negligence and carelessness of the hospital. KM Riaz Morshed, resi-

dent surgeon of the emergency unit, said the on-duty doctors told him that they released the victim after finding him out of danger. He, however, admitted

that Mamun should have been admitted and treated under observation.

He said they would investigate the incident.

#### Obituary CITY DESK

AH Abdur Rahman, an architect and engineer, died due to old-age complications at Apollo

Hospital in the capital early Monday.

He left behind his wife, two daughters and a son. He was buried in New Azimpur graveyard.

A doa mahfil will be held tomorrow after Asr prayers at his residence (3 Nao Ratan Colony, New Bailey Road, Dhaka).

# Problems dog railway east's workshop SHAHADAT HOSSAIN, Ctg During the monsoon, some shops even get workshop, said Md Harun-ar-Rashid, chief

With antiquated machinery, shabby infrastructure, and half of the required workforce, the Carriage and Wagon Repair Workshop of Bangladesh Railway's East Zone in Chittagong city has been tottering for more than a decade The problems have been persisting because of

delay in the implementation of a development project, initially taken up in 2007. Japan International Cooperation Agency (Jica) and the Bangladesh government will fund it. Sources at the workshop, established on 35

acres of land in Pahartali in 1947, said the lifespan of 437, out of 449 pieces of machinery, had expired and their efficiency was dwindling. The workshop has 20 shops, mostly tin-

roofed, and the roofs of many of them have developed large holes, letting rainwater pour into the machinery.

waterlogged because of a poor drainage system occasionally suspending repair works, said the According to official records, the workshop is

presently run by 1,158 staff while there are posts for 2,128. Of them, 52 are officials and the rest workers. Officials said the present workforce was too

small to carry out the routine maintenance of

around 930 coaches and 7,000 freight train

wagons of the east zone covering Dhaka, Chittagong, and Sylhet divisions. Wishing anonymity, an official said only one coach (which makes two units) could be taken care of a day when the demand was for five units. As a result, around 500 coaches remain unat-

tended annually, he added.

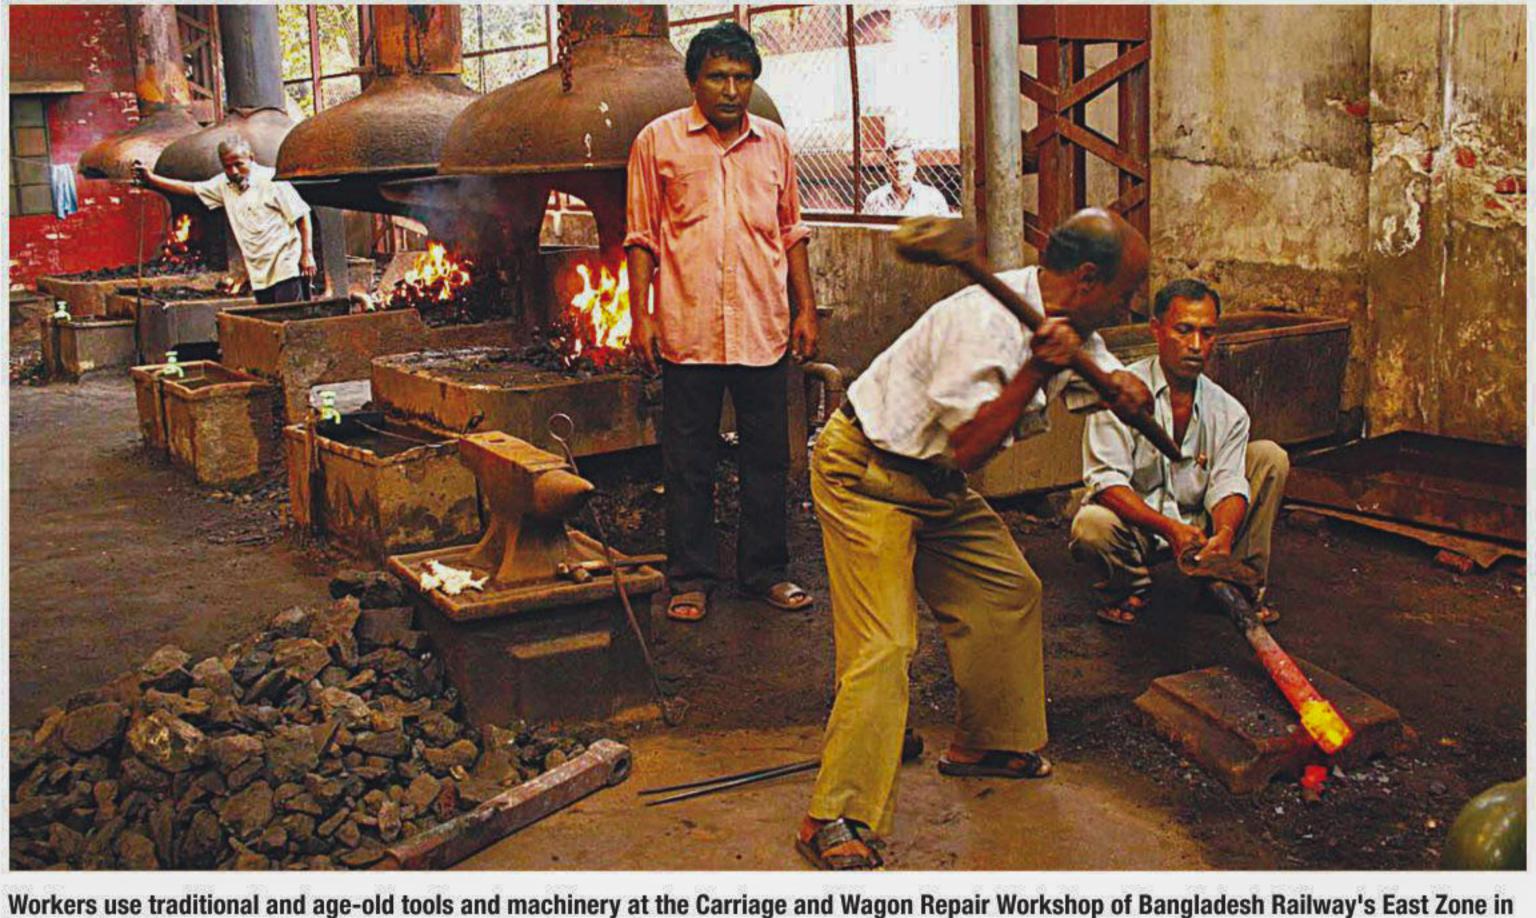

To mitigate the manpower crisis, 142 new employees have been recently recruited into the mechanical engineer of the east zone. In addition, for overall development of the

workshop and nearby Diesel Electric Locomotive Repairing Workshop, the "Improvement of Pahartali Workshop" project was taken up in 2007, said Harun, also the project director. On January 20 this year, the Executive

Committee of National Economic Council (Ecnec) approved the two-year project worth Tk 217 crore, of which Jica will give Tk 175 crore and the government the rest, he said. The PD said the project was delayed because

qualified bidders were not found, but he hoped it would get rolling in three or four months. Under the project, the infrastructure of the

shops will be developed, over-aged machinery will be replaced with modern equipment, and the drainage system and damaged railway trucks will be improved, he added.

### Gas crisis keeps choking Ctg city

STAFF CORRESPONDENT, Ctg

Gas crisis in Chittagong city continued for the fourth day yesterday. Many areas of the city have not been getting any gas, while others are getting at a very low pressure since Saturday. Officials of Karnaphuli Gas Distribution Company Limited said the situation would return to normal in two to three days, adding that Bangladesh Petroleum Corporation officials told them Bibiana Gas Field had been producing 550 million standard cubic feet less than usual, as overflow of condensate had affected the pipeline.

# US firm hopes to build quake predictor STAFF CORRESPONDENT A US-based aerospace firm is working to develop a system to predict earthquakes a fortnight ahead of occurrence and

expects to put the mechanism into operation in the next three to five years, an engineer of the company said in Dhaka yesterday. Forecasts will be based on satellite infrared signalling of the earth's movement and readings of high-tech sensors

implanted in the ground, Jon Pineau, a senior space systems engineer of the firm, Stellar Solutions, told a select group of journalists at the American Center. He said QuakeFinder, a research project of Stellar Solutions to develop the technology for detection of

electromagnetic earthquake precursors, had found that the earthquake precursors occurred eight times before the actual quake struck. The analysis of noises and pre-earthquake human and

animal behaviours will also be used to design the forecast system that will undergo validation (trial) for the next three to five years to make sure the forecast is correct, he added. So, it will be based on three different phenomena -physical properties that seem to give an indication of a

produce a dependable signal of earthquake precursors, Jon explained. "We are optimistic but still in the research phase and repeated validations of the detection system by authorities like US Geological Survey would put it into operation in the

possible earthquake, scientific theory, and the data that

practical field by and by," he said. Jon, who promotes international space missions of Stellar Solutions but does not work directly with QuakeFinder, claimed that the sensors were working fairly well within a 10-mile radius on the California fault line, in Greece, Peru, Chile, Taiwan, and Sumatra.

QuakeFinder is working on developing wide-range sensors to efficiently detect the earthquake precursors, he said, adding that a sensor presently cost \$35,000 to \$50,000.

Separately, noted seismologist Prof Syed Humayun Akhter told The Daily Star that dedicated organisations like Washington-based Incorporated Research Institutions for Seismology and the US Geological Survey had not yet devised an earthquake forecasting system.

Neither has Japan, despite a decade-long research, simply because it is not yet possible to forecast when strain energy building up between two locked tectonic plates will release, he said. However, the location of a probable earthquake is already calculated with the earth's ground deformity with the help of Global Positioning System and satellite images, he said.

Experts apprehend that Bangladesh stands at the crossroads of a devastating earthquake with above 7-magnitude on the Richter scale because of geological position, tectonic setup and seismic history. Jon Pineau came on a week-long Bangladesh tour at the

invitation of Engineering Students' Association of Bangladesh and the US embassy in Dhaka to speak to would-be engineers.
