

#Problems

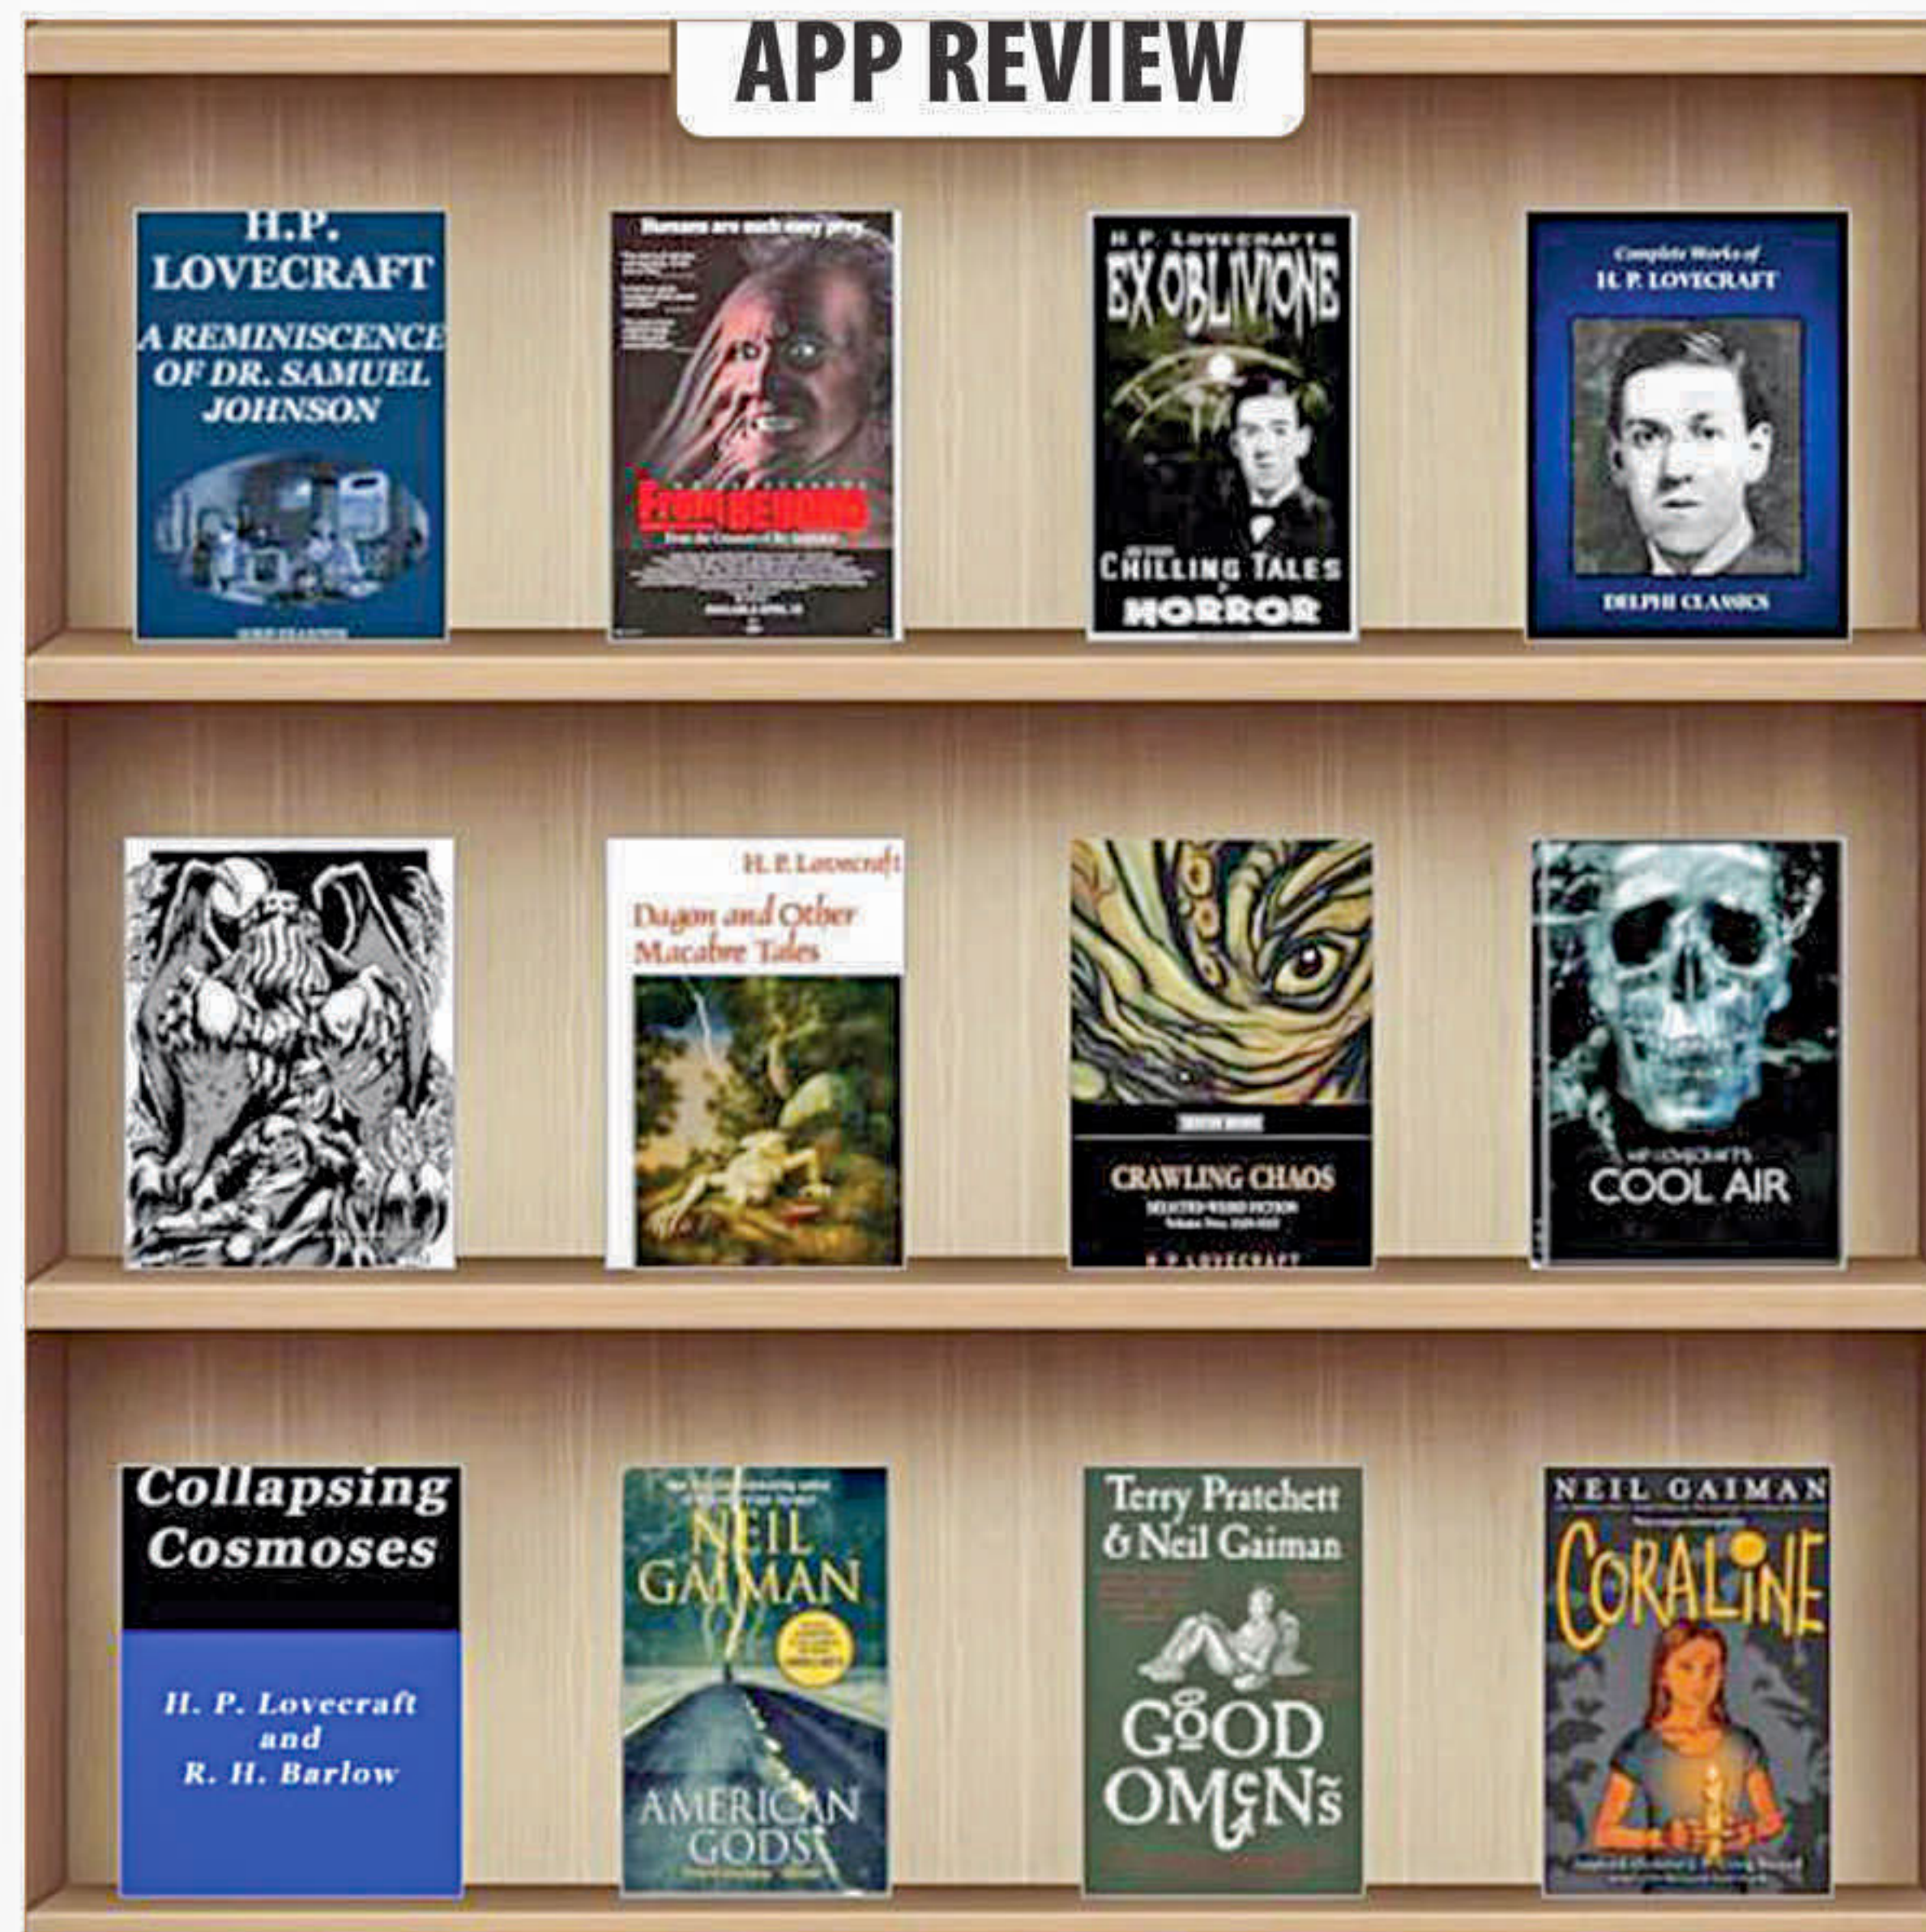

Before Facebook, you really needed to work hard to air your opinions publicly. Like write several hundred articles until you are blessed with a 150 word editorial. Now you can literally click an icon and change something from private to public and let the world know. Even when you don't, it still leaks out at times.

If you're someone who can't articulate their opinions well online and end up sounding somewhat bigoted or controversial, meme pages can get a hold of that screenshot and practically ruin your life. No one checks who or what you are, they just share and cuss away. Some even blame smartphones, social media and the digital age for such statuses or tweets.

The flipside of social media activism is straight out cyber-bullying, especially when it's a picture or a status of someone young who might have uninformed opinions. It might ruin someone's life or career and give them no chance to rectify their mistakes. Share carefully. Only dank memes can be trusted.

APP REVIEW

UB READER FOR ANDROID

RAYAAN IBTESHAM CHOWDHURY

Universal Book Reader is a free eBook reader for Android by MobiSystems. It's a no-nonsense app that lets you read eBooks in either pdf or epub formats. Although it has one particular shortcoming in not being able to open mobi files, everything else you get in its free version makes UB Reader an easy choice for reading on Android devices.

All the pdf and epub files on your device are neatly organized onto a digital bookshelf. You can create more shelves within shelves if you are interested into further dividing your books into sub-categories. The shelf screen is your homscreen, which may have ads. But once you open a book

and start reading, you won't have any ads getting in the way.

The reading experience is simple and efficient. You can fix brightness as well as change the background colour; the options being black, white and sepia. I found sepia the easiest on the eyes. Font sizes are adjustable and the app also gives you a landscape mode. Where you last left off in a book is auto-saved.

The only visible lag I found on this app was when I was importing books I downloaded to my device as email attachments. But I was using a 512 MB RAM device and even then it was minimal.

Free and doing just what you need it to do, this is a must if you read on your Android device.

THIS WEEK'S HORRORSCOPE

ARIES

Stay up at night and you'll go past wide-eyed and enter the realm of crazy-eyed.

TAURUS

Grab a bull by the horns in a china shop. The owner will thank you for it.

GEMINI

"Touch Fuzzy, Get Dizzy" is Nintendo for "Check yourself before you wreck yourself".

CANCER

Can Polo expire? I hope not, for my sake. My throat feels like it's rusted.

LEO

I made coffee with rusted equipment last night. Best coffee I've made in my life.

VIRGO

You can rob a bank in the guise of going to get a bank account! Brilliant!

LIBRA

Blast weeb music late at night to get rid of your annoying neighbours.

SCORPIO

I apologize for being unworthy of the sacred trust you placed upon me.

SAGITTARIUS

Kids are the best at flipping coins and patties. You can ask Spongebob Squarepants.

CAPRICORN

Your degenerate lifestyle affects the plants around you. Their roots grow more.

AQUARIUS

Soda apparently burns the lining of your stomach. This was a PSA from a little kid.

PISCES

Disenchanted leads to clarity which leads to insight into rare humour.
