

What goes up must come down

(Alt: Rat poison is for vermin)

HSC results are out, and it appears that the pass and GPA 5 rates have gone south (unlike child abuse and violent deaths). Some are of the opinion that the results reflect a fair

assessment, while some are blaming the opposition party for this "disaster". This brings us to the issue that matters the most: students who must face the snickering of and insults from the judgmental aunties and uncles. THE ABSOLUTE WORST when your confidence is more fragile than an iPhone.

You are not your results. Mope around for a few days, if you must. Don't look at that roach or rat poison though; you're better than that, yes? The world didn't stop rotating because you didn't do well (or well enough) in HSC.

If you're going through an extended Pepe <insert sad frog face meme> phase, give this a read:

THIS WEEK'S HORRORSCOPE

ARIES

You will wonder if the glass is half empty or full at length.

TAURUS

You will end up hopelessly stuck with your fingers tangled.

GEMINI

Your mother cuddles you in your dreams and in real life.

CANCER

Ask for help. You need it. Alone, you're useless. It's true.

LEO

Inspiring! Wow! Really makes you think! I don't bilivit!

VIRGO

The time you failed a test in Class 1 will return to haunt you.

LIBRA

Ghosts of the past stole a DeLorean and are out to get you!

SCORPIO

Cigarette smoke affects your future vision and present sight.

SAGITTARIUS

Let go of your pride, admit to being short and sit on a dictionary.

CAPRICORN

Establish you're superior to circus animals by doing their tricks better.

AQUARIUS

"Oh yeah. That's right. Uh huh. So true." You'll say that.

PISCES

So you want horoscopes to be accurate, nice and truthful? Whaaaa-

APP REVIEW

Fallout Shelter

MAYABEE ARANNYA

Platform: iOS. Android version coming out today.

Developer: Bethesda

Size: 187 MB

Fallout Shelter is a mobile part of the Fallout series of post-apocalyptic video games. This game's probably going to make you a more horrible person. Take caution.

The game appoints you as the Overseer of an underground vault that can house up to 200 dwellers. Your main objective is to keep everyone happy and make sure supplies do not run out. You can build rooms ranging from living quarters to nuclear reactors, gardens, water treatment plants and much more. Appoint dwellers with the right set of skills in the right rooms to gain maximum efficiency.

It starts out really fun and innocent: making new rooms, getting dwellers to make babies to expand your vault, completing objectives in hopes for "lunchboxes" that contain special items. You don't need to spend any real money to get new items and it's fairly easy to make more "caps" which is the currency of the vault. When you get to around 100 dwellers, the boredom kicks in. The evil side of you awakens. You start hoping for epidemics or raider attacks just so something new happens. You start sending out unnecessary dwellers to the outside wasteland to die. You make everyone cheat on each other. Or maybe I'm the only one who went to the dark side; you won't know unless you play.

Overall, the fun of the game lasts only a few weeks but it really is worth it if you have time to kill, and it's free so win-win. Give it a try!

MIXTAPE

FIRE

Switchfoot
On Fire

Ed Sheeran
I See Fire (Kygo
Remix)

AWOLNATION
