

Shake that Goatee

The internet is not only filled with cats. Not here in Bangladesh, at least. Goats roam around as freely and get their views published, their voices heard and jokes laughed at. The best part: you can't tell a goat what kind of jokes to crack. And I suppose that's where Rantages stepped in and achieved supremacy. To speak your mind while making crude remarks (and discombobulating so, so many people in the process) is like music and everyone at Rantages is like Baaa-ch. You read that right. Now move on.

APP REVIEW

MUSIXMATCH

RAYAAN IBTESHAM
 CHOWDHURY

Platform: iOS, Android

Musixmatch is a free music player for Android. Its floating lyrics option, sleep timer and extensive album art collection gives you the best music player experience available on the app store. Stock music player apps on our phones generally leave a lot to be desired. Musixmatch easily surpasses them. It has the Shazam like features of identifying songs using the phone's microphone. So for any song that you aren't familiar with, the app can help you identify the song and also link you to it on Spotify or YouTube. It has another innovative feature that I really liked: a sleep timer. I like dozing off with my music

playing and have fallen asleep countless times with my music still playing, something that's both charge consuming and bad for your ears. Musixmatch gives you a sleep timer so you can fix an approximate time that you want to keep your playlists going for. The lyrics function identifies the lyrics of pretty much every international song you have available. As for Bangla songs, you will get a few lyrics for bands like Black or Warfaze, though not all, and most artists won't give you any lyrics at all. Unfortunate, but to be expected from a foreign app developer. It will need a good WiFi or 3G line to perform everything seamlessly so keep that in mind. But if you don't mind spending some data on your music player, then Musixmatch is a must.
