

COVERS

Sofas can be covered with green leaf-patterned fabrics to go with the wooden brown furniture. Or you can also try out bold green shades for cushion covers to strike out in a pastel-themed drawing room or living space.

CORNERS AND CENTRES

Plants on pots are outdated and they can only be kept in balconies and terraces, but to add it to your home décor use clear or ceramic vases that not only acts as a showpiece on its

own but also highlights the plant.

You can also place them near the window sills so that the sunlight can reflect on the leaves and give a relaxing environment similar to the beach. Tiny dwarf plants are sold even in departmental stores. Decorate your center table or corner table with candles draped in leaves.

PRETTY PETALS

Let's face it...it is difficult to find flowers on trees and cherish the blossoming beauty with our hectic lifestyle.

Having to leave early in the morning for work and returning late at night, we can only enjoy the freshness and splendour if we get a flower from a loved one, but why rely on that? So add flowers to your interior décor and make your house and life colourful. Experiment with the apricot, mint and peach hues for the breathtaking subtlety.
