

regular painting.

LOOK CLOSELY INTO THE JOINTS

While they keep your furniture together in perfect unison, bad joints will turn out to be a nightmare. Look for wooden dowels and corner blocks in the joints. Also, check whether the frame is properly joined by lifting up one front leg of the sofa. If the joints are strong and well-fitted, the other front leg will shortly follow. If it stays on the ground then it's a sign that the sofa is already wobbly and you should walk away from this one.

STAY IN TREND WITH NEUTRAL COLOURED FABRIC

If you want a sofa that will stay in style throughout the years, a synthetic fabric of a neutral colour could be your choice. Buy a darker shade of fabric to bear with stains if you have children and clumsy adults in the house. Throw in colourful cushions to make the neutral colour come alive. This way, change of trend in colours will mean only changing the cushions and thus will make your sofa impossible to go out of style.

SIT ON THE SOFA

As obvious as it sounds, a lot of people still buy a sofa that only looks comfortable. Do not be one of them. Sit on the sofa and feel if it is good for you. When you sit on a sofa that has a good depth for your physique, your feet will touch the ground, your thighs will be parallel to the ground, and your back will be comfortably straight. Also, check if your lower back gets support from the back.

You have to take a lot into consideration

while buying a sofa such as the use (whether it is for formal sitting or family reclining), number of people it will seat, and the style (traditional or modern). Considering all these, see if it will go well with the rest of your furniture and use your intuition to choose; for a good sofa will truly become your living room companion.
