

Buying Video Games

It's incredible how many hoops we have to jump through to get our hands on a Steam or Origin purchase. To buy a video game, we have to do things such as bKashing merchants on Facebook stores who charge nearly Tk. 90-100 per USD, to begging our friends abroad to buy the game.

While our neighbouring country India supports Origin sales, we are left with nothing. With a Dota community boasting 4000+ members, a LoL community with nearly 3000 members, Counter-Strike players nearing 4000 members and FIFA players summing up to a whopping 16,000+ players, I am sure there are enough transactions to go around. When do we get to buy our vidya directly, then?

THIS WEEK'S HORRORSCOPE

ARIES

This is a public service announcement brought to you in part by Slim Shady.

TAURUS

My brain's dead weight, I'm trying to get my head straight.

GEMINI

Dear Slim, I wrote you but you still ain't calling.

CANCER

You got some issues Stan, I think you need some counselling.

LEO

Will the real Slim Shady please stand up?

VIRGO

All you other Slim Shadys are just imitating.

LIBRA

I'm sorry momma! I never meant to hurt you!

SCORPIO

Tonight I'm cleaning out my closet.

SAGITTARIUS

They call me Superman, I'm here to rescue you.

CAPRICORN

Maybe I'll love you one day, maybe we'll someday grow.

AQUARIUS

There's vomit on his sweater already, mom's spaghetti.

PISCES

Sing with me, sing for the years, sing for the laughter, sing for the tears.

MIXTAPE

Siesta

Eurythmics
Sweet Dreams (Are Made of These)

The Smiths

Asleep

Bush
Letting the Cables Sleep

World's End
Girlfriend
Birthday Resistance

Bonobo
Sleepy Seven

Donovan
Get Thy Bearings

Tess Parks
Refugee Camp

MADVISER

An app to reduce your mobile bills

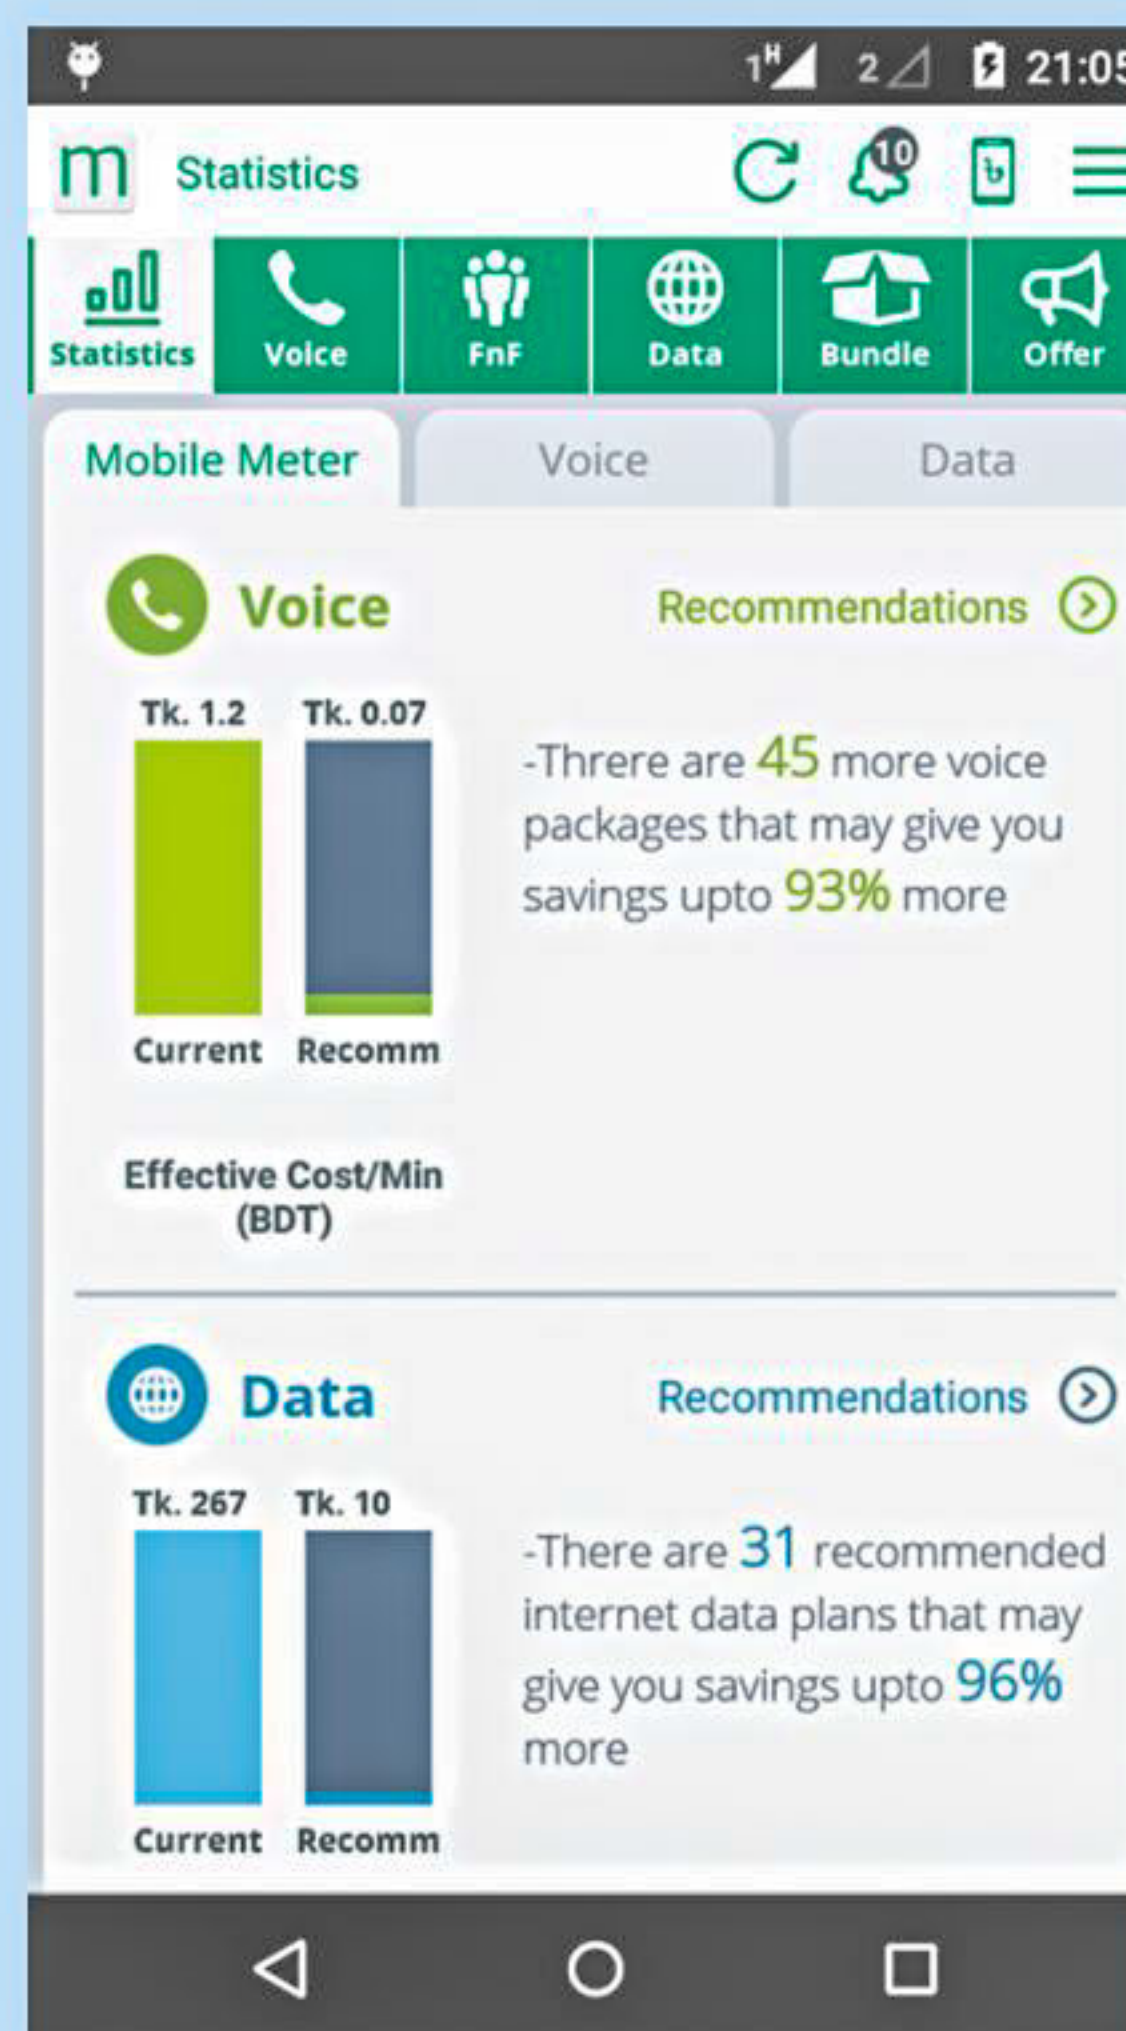

ARMAN R. KHAN

Platform: Android (2.3 and above)
Size: 4.4 MB
Rating: 4.5/5

Madviser is a free local app by Humac Lab that helps to minimise your mobile bills by suggesting the best packages for you.

You start with providing your mobile number. The app then analyses your mobile usage behaviour over the last seven days, such as voice calls and data. It compares your current voice and data packages with other available ones and shows how much you can save just by switching to a different package offered by your mobile operator. Moreover, the app analyses your calling patterns and suggests which numbers you should add as your 'FnF'. All these insights, comparisons and suggestions are provided in the form of infographics that are easy to understand.

Another added advantage is the easy activation of voice or data packages, FnF numbers and special offers from within the app. All you have to do is let Madviser analyse

your mobile usage pattern, see its recommendations, and click the activation button if you like the suggestion.

Though there are some complaints, the app generally got positive reviews from users. I personally think it's a great app as it helps in optimising your mobile bills based on your unique usage. Give Madviser a try and see if you can save some mobile balance; I know I did.
