

Your Hopes and Dreams

Remember the time when you were 6 and you wanted to be a Power Ranger? Or when you were 13 and wanted to be Llama Del Rio? But you didn't know where to get those fancy suits and your cosplay game was weak.

Or you couldn't yodel. Yes, every day billions of hopes and dreams die tragic deaths. Some of these deaths are for the greater good, however. Let's go with that.

It's important to understand your reality before you decide to choke your dreams to death. If you're brave and confident enough, hell, you may even try and change your reality.

It's also important to understand what kind of an Instagrammer you are and how many people grit their teeth when they come across your posts.

– Karim Waheed, Editor, SHOUT

THIS WEEK'S HORRORSCOPE

ARIES

Tonight you will be visited by the spirit of indecisiveness. Maybe.

TAURUS

Your go-to answer to anyone who asks about your grades should be "ayyy lmao"

GEMINI

Your friends will confront you about your Hannah Montana addiction. Too bad they can't catch the both of you.

CANCER

Someone will recharge your phone's balance by mistake. You should thank them.

LEO

You'll recharge someone's phone balance by mistake. They should thank you.

VIRGO

Cancer and Leo make a cute couple. You'll be alone forever.

LIBRA

Every time you listen to Coldplay, a child in Puran Dhaka starts a rap career.

SCORPIO

Guns don't kill people, your terrible game sense kills people. Git gud.

SAGITTARIUS

Lag.

CAPRICORN

Would you rather eat a goat-sized fish or a fish-sized goat?

AQUARIUS

If a hipster falls in a forest and no one is around, does anybody even hear it?

PISCES

This week you shall be as relevant as Bono thinks he is right now.

APP REVIEW

SAVE IT FOR LATER WITH "POCKET"

NAZIFA RAIDAH

Platform: iOS, Android, Windows

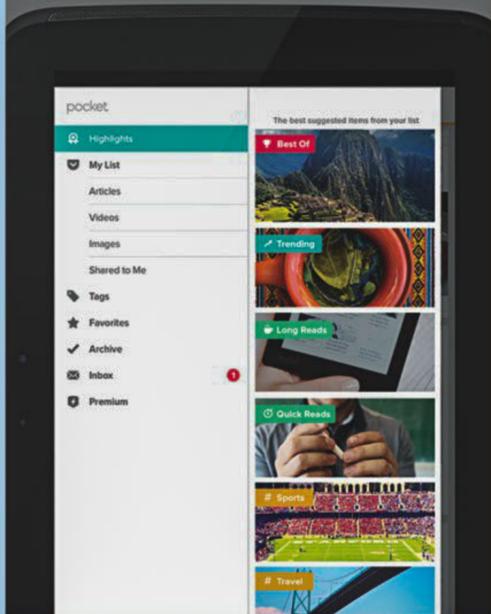

If you're among the multitudes of people who have plenty to read and not enough time to finish reading due articles, then the app, "Pocket", can save your day. Pocket is the new face of read-it-later with better layout design and other amazing features.

On Pocket, you can save lengthy articles or videos and queue them up for reading and watching later, whenever you want. Links are automatically cached for offline access (videos excluded) directly from your browser. One of Pocket's biggest features is the ability to filter by content type; you can sort by image, video, and traditional text. If you want to categorise your saved content, Pocket also allows you to tag content by tapping the pencil button at the top right, selecting items, thus creating new tag.

The service has also introduced a "Recommended" section with content customised to your saving and reading habits. Reading articles on Pocket is quite a joy as it allows you to adjust text size, change fonts as well as changing themes from light, dark and sepia. Generally Pocket displays the article view of saved items, which is a distraction-

Best of Your Pocket

Highlights surface the best content you've already saved.

free, easy-to-read format, and in web view if it's unavailable. A recent add-on to the service is the "Listen (TTS)" feature where articles will be read to you according to your adjusted voice speed.

Pocket offers the ability to share content on social media. You can also save to Pocket through their browser extensions for Chrome, Safari, Firefox and Internet Explorer. No more piling innumerable links on your browser; all you have to do now is Pocket them.
