

# ... rooftops

going to get hot. Add a large umbrella to beat the heat. If you are more ambitious, you can construct a concrete canopy and let beautiful creepers wrap themselves around it to make a charming refuge from the sweltering heat.

## GET COSIER

Winter is coming. So you should make your rooftop less of a hostile combination of brick and concrete and more of a relaxing retreat, which is cosy when required. Add some waterproof rugs and a few washable canvas cushions. A table is a useful option

too. These items can be of calm earthy tones or bright flamboyant colours, according to your taste. Add some beautiful lamps to make your rooftop even more inviting.

## COOK A LITTLE

Most of us do not have the luxury of a backyard for barbecuing, but a rooftop is a great substitute. Add a grill and you can host your own fun barbecue parties. Very little can compare to great barbecue and some good company under a starry night sky.
