

## SEASON OF CHANGE

**T**HEY say the only constant in life is change and regeneration. And the time for that change and rebirth in nature is here and now. Trees are shedding their dead leaves, bringing forth fresh, colourful sprigs. Look around, and fruit trees bloom and flowers blossom. For why not -- this is the season of forgetting the past and embracing the new. Usually, this season gives us the first showers of the year, after the dry season. This year, Dhaka saw a hailstorm to the surprise of the city dwellers. Many made a day out of it, having fun in the rain and hail while others took cover.
