## THE WOMAN NEXT DOOR

Every year on Women's Day, we like to compare and draw lines between the roles women played in the past few decades and the present. On this very day, we prefer to put the woman under the microscope, observe her evolution in life, celebrate her successes and at times remind her of her failures as well. To the agony of many, some end up taking these analysis reports seriously.

The *Star Weekend* takes a look at the different roles of the woman next-door, and 'surprisingly' enough, finds them to be special, no matter who they are and what they look like. To read our spotlight this week, turn to pages 8 and 9.
