

## When the Reds go marching in

In the early hours of May 25, 2005, I sat in the living room in front of the TV, enchanted by the songs of travelling Liverpool fans witnessing the Miracle of Istanbul. For a young fan from Bangladesh, it was a life-changing moment because to this day I look back upon those players and that match for inspiration and so much more. Fast forward to May 13, 2006, I witnessed another spectacle. This time we won the FA Cup beating West Ham. My mom's squeal as Gerrard let fly the ball into Hislop's goal still rings in my ears; I had sprained my ankle while celebrating. What days they were. One might harbour a million reasons as to why they support a team. My love and loyalty to Liverpool FC can't be rooted to any cause, hence a magical mystery to myself, but one that I am happy to savour for the rest of my life. I'll Never Walk Alone.

## AMBIENT SOUNDS PERFECTED

ARMAN R. KHAN

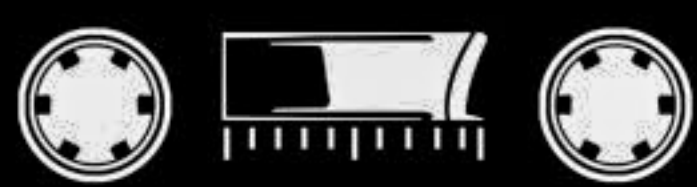

Sometimes, a little relevant background sound is all we need to get into our zones. But we are often subjected by annoying noises that hinders our focus and productivity. That's where Noisli.com comes in provides the right ambient sounds to incite productivity or help you relax.

The best thing about Noisli is the plethora of ambient sounds available so that you can choose the ones that work best on you. Unlike Rainy Moods, which only provides the sound of rain and thunderstorm, there's something for everyone at Noisli. Currently there are 16 different sounds you can choose from, including ambient noises of a café, rain and roaring thunders, crackling of a fireplace, and rustling leaves among vari-

ous others. You can choose a combination of various background sounds and customize the volume for each as per your preferences.

The interface of Noisli is neat and easy to use. The website's services are free, but in order to unlock the advanced services such as the text editor, the timer and the favourite combo, you just need to sign up with your email address. There's an iOS app of Noisli available, but the Android app is still under development.

So, does it really help in boosting productivity or helping you relax? Personally, I found that it does, and the testimonials by The New York Times, The Wall Street Journal and others indicate likewise. Give this service a try by going to [www.noisli.com](http://www.noisli.com) and choosing the right combinations for yourself.
