

Casa Deco – where imagination meets reality

Casa Deco is the sister group of Dhaka's number one home interior company, Increation. Shafqat Rahman, a very ambitious young man, has introduced this whole new artistic world on how to decorate your home. In the last four years, Increation and Casa Deco have seen plenty of success.

Casa Deco is anybody's one stop solution for beautifying their home. The greatest thing about their products is that they are not monotonous. They don't produce furniture only of a certain type or colour; rather, they use varieties of colours and techniques in their productions. They provide furniture in different styles, including contemporary, eclectic, traditional, rustic, industrial, and many more.

Don't expect just one dull, basic, boring colour for all their products. If you visit their store, you will feel vibrant due to the use of artsy and sophisticated colours they use for their products, including Tiffany blue, champagne, and even a charcoal finish.

Casa Deco mostly concentrates on their mirrored furniture, which is their specialty. But other than that, they also produce modern vintage, shabby chic, modern and Victorian style furniture.

The raw materials for the products are usually imported from London and America. The materials are brought but 99% of their products are manufactured in Bangladesh, except for a handpicked few, which the owner himself selects and imports. The imported products are few and the collection is rare. Not only will they provide you with what's in their catalogue, but they will also do any custom-made products. When asked, Rahman said he believes that the synergy between the client and the designer is essential for any project's success.

Along with providing high-end furniture, Casa Deco also offers other home décor

items that are needed to complete the whole look of a home. They import products like lamps (both floor and table), chandeliers, rugs, mirrors, wallpaper, and many other rare exclusive pieces.

Every item manufactured is polished with grace and care and it is all done to perfection using the best possible materials. When asked about their commitment to the customers, Rahman said "when it comes to furniture, there isn't anything we don't

do". They are not just providing you with furniture; they also provide the assistance that you might need to decorate your home. With Increation as their parent company, they assist you in decorating and renovating apartments, individual houses, floors and even individual rooms! With the large range and variety of products and the assistance they provide for home interiors, the merging of the two is highly convenient for the clients!

With the help of Interior Stylist Nazma Mendez and Head of Operations, Farhan Zahir, Casa Deco succeeds to bring a smile on the faces of every client and customer. And for Increation and Casa Deco, this is just the beginning as they plan to go a long way ahead and are also planning to introduce a new line of products as Casa Fabrics.
