

LS PICK

Knapsacks

Be it for work, outing, or school, the one thing we all need is a bag. Although people of different professions and ages chose to carry different styles of bags, it all comes down to three basic things – space, style and of course comfort.

Backpack, a trend of the 90s, has made its way back into our lives and all for good reasons! Its functionality intrigues us, it is easy to move around with and the two straps make it easier to carry and unload from one distinct shoulder. Its wide array of sizes makes accommodation easier - from school supplies to office files, to water bottles and other random things we cannot do without.

The unisex design makes it convenient for everybody. One can carry anything or everything without the burden of space or unease. Its use is not finite anymore, backpacks have made a comeback – smarter ergo classier!

SPORTY CHIC

For the sports loving, outdoor person with a flair for classiness, backpacks do not disappoint.

Denim rucksacks scream sporty, tie n' die prints say outdoors and nylon backpacks protect your possessions from water while giving off fun yet bright vibes. Other than that, some classic prints always say chic yet fun. Navy and white striped bags give the oceanic feel and prints such as oversized flowers and leaves give us a tropical feel in the summer. These kinds of backpacks go hand in hand with students or young adults supporting their books or possessions while giving off a lightweight feel.

CLASSIC BLACK

One can never go wrong with black. It is a universally flattering colour that fits into everyone's lives and fortunately into our bag's lives too. It could be natural suede leather backpacks, could be studded or quilted giving off an edgy yet

mature look to the attire.

MODERN ELEGANCE

Faux leather backpacks, waxed canvas backpacks, patent leather or fold over backpacks, city backpacks or post backpacks - backpacks with modern flaps provide a retro modern look while being subtle enough to look sober.

These do not fall into any age or profession, but anyone from a school boy to a working man can sport such bags for a modern day look.

Other than these few, there are also backpacks with sequins, tassels, embellishments, faux fur and mini sizes too. One could go with embroidered backpacks for a bohemian flair, or colour blocking for a back to school look. Pair up rucksacks with ones shoes or attire, carry different sizes when needed.

The best part about these backpacks

is their infinite variety and availability, which makes them an easy choice for everybody. Small sizes for regular day outs, large ones for school or college, medium sized for office or work. They are widely available at all bag stores across town, and come in wide price range too, so there's something for everybody.
