

COMING SOON  
**SNOWDEN**

From the Academy Award winning director Oliver Stone, comes "Snowden" the politically-charged, pulse-pounding actioner starring Joseph Gordon-Levitt and Shailene Woodley. The film exposes Edward Snowden's implausible untold private story, the deviating symbol who disclosed the NSA's outrageous illicit surveillance activities and became one of the world's most wanted men in history. He is a hero to some and a traitor to others. No matter what your choice is, the epic story behind his reasons makes it one of the most captivating movies of the year.

The film is due for release on 16 September 2016. Till then, you don't have to pick a side, but you will.
