FIFA 07 Masterrace

While Fardeen is looking at the FIFA 17 demo this issue, I spent the good half of the last six months playing as FC Carl Zeiss Jena on FIFA 07 which came out exactly 10 years ago. Now, why would I do that? FIFA 07 is just one of those games that perfectly illustrate how an arcade style FIFA can work. With crazy long shots, absurd physics and a tongue-in-cheek Manager Mode, FIFA 07 will take you back to the time where the 90s heroes were kicking their last and today's superstars had abysmal overalls. You can't really have Emmanuel Petit, Henri Camara, Andriy Shevchenko, Claudio Lopez, John Arne Riise, and Sebastian Helbig playing alongside today now, can you? Oh, and Riise has an 85 overall rating in CAM. Take that FIFA 17. Also take my rose-tinted nostalgia goggles please.

APP REVIEW

Procrastinate on Mars

FATIUL HUQ SUJOY

Platforms: iOS, Android

When a game is easy to pick up and fun to play with just the right aesthetics, you know you just got yourself a new buddy for leisure times. Mars: Mars from Pomelo Games is a great example of how the simplest gameplay can be challenging and equally engaging.

You play as an explorer on Mars sent there by MarsCorp. You are given a jetpack for exploration but you can only move from one launch pad to another. Also, your jetpack has limited fuel. You start your flight with a tap and control your direction by pressing the left or right side of the screen for the respective jets. You have to press both sides for reducing speed while

landing because without a soft landing you'll be blown to pieces.

You can skip over launch pads if you're tactical and brave enough. During jumps you'll be given coins to collect and black holes to avoid. You can also earn coins by watching ads or completing certain goals. Coins are needed for the best part of the game - character unlocking. You start as Max but there are 29 other characters who can be sent from Earth if you pay enough coins and wait a few hours for them to arrive. The great thing about new characters is that each one sets a unique environment on the planet, further enchanting you with the game's mesmerizing graphics. Don't forget to unmute while playing if you want a therapeutic audio session.

You can also take selfies of your character on Mars, because why not.
