Gain the body shape you desire

By changing food habits and taking regular exercises, one can control weight but it is still difficult to reduce body shape.

For achieving the desired body shape, one needs ultramodern treatment. Considering this, Dr Jhumu Khan's Laser

Medical Center is providing a non-surgical treatment called 'Ultrasonic Lipolysis.'

Under this treatment, the fat cells in particular zones of the body are saturated through ultrasound waves. This UMD method allows for draining out fat and

gain the body shape that one desires.

Also, proper counselling for a balanced diet is provided from Jhumu Khan's centre. Bicom Therapy is also given for reducing obesity.
