

The Facebook Socialites

The status update box brought us a truckload of opportunities that was absent before. Now your opinion could be spread throughout the globe in only a few hours. What Zuck didn't consider was exactly how toxic people's opinions could be.

Burger King opened in town and a bunch of people flocked there, forming a queue. That suddenly became social suicide. Status update after status update mocked those whose only crime was to be excited about an international chain coming to Bangladesh. Mind you, the ones complaining are the same people who whine about Bangladesh not having things that are abroad. It's a vicious cycle on Facebook that has bred a generation of idiots who think criticising other people's actions is the only way to appear smart. No, you'll probably live the rest of your life alone with 18 deaf cats.

APP REVIEW

TIKI TAKA SOCCER

RUMMAN R KALAM

Platforms: Android, iPhone

When you finally get stonewalled or finish Score Hero, the itch for a good football game on your phone remains. Most of the games last for a good hour or two before becoming too repetitive or greedy. Tiki Taka Soccer doesn't innovate anywhere except the general feel of a football game on mobile. The UI and the graphics of the game will throw you back to the SNES golden generation.

You control all eleven players with touch controls that have been simplified for use; they're easy to get into but

difficult to master. You can flick to shoot or slide tackle, tap a player to charge him with the nearest player or pass to your teammate, press and hold the ground for a through and such. The game features a career mode which has been balanced really well as you don't have to spend real money to be successful. You start at the 5th tier of whichever country you decide to manage and work your way up 38-game-long seasons to the very top. Pro-tip: buy 5 speed old strikers, get an accountant, and make sure to use your energy drinks at half-time.

All in all, Tiki Taka Soccer might be the reason you will get a power bank.
