

GRADUATION WOES

As I prepare myself to start my final year at university, I can't help but think of all the changes I'll need to make when I graduate. The chill life of an undergrad student will be over for me. No more binge gaming at night, no more caffeine-induced-last-minute term papers, and no more going to the campus I've gradually come to love. Then there's the matter of finding employment. You might know where to apply and what to apply for but actually landing a job is a whole different ball game. For all you peeps who are starting your senior year at university with absolutely no clue about what to do with life, you're not alone.

APP REVIEW

RUMMAN R KALAM

Platforms: iOS, Android

Genre: RPG

RPGs on mobile devices tend to feel far heavy than they should be. It's awkward playing a God of War rip-off that slowly turns my phone into an induction cooker. Not to mention the time investment each levels may take. We've often seen that simple games fare much better in the mobile world.

So where does a game like The

Last Vikings fit in? It's an RPG that manages to meld a few minigames into one packaged experience that you can simply flit in and out of. Even if you have to quickly close the app and do something else, it won't hurt because the stage-by-stage progress is not difficult to achieve. You grow attached to the tiny, cute Vikings and their wacky names. Get a ship, get a crew, sail, and plunder away!

I'm not gonna spoil the experience for you. Go ahead and try it.
