

KONA'S ROUTINE

Cleaning and moisturizing is a very essential part of her daily skin care routine. Since she has to do a lot of heavy makeup almost everyday, she makes sure to remove all of that with a top quality cleanser and then moisturize thoroughly. For her hair, she tries to apply olive oil as frequently as possible and use a good a shampoo to keep her hair clean everyday.

Although her work makes her wear heavy makeup almost all the time, she tries to keep her face makeup free as much as possible. But one product Kona can't live without is the lipstick. The right lipstick can completely change a person's entire look. However, the wrong colour can completely destroy the look. Therefore, Kona prefers to wear light or nude-coloured lipsticks during the summer and dark-coloured lipsticks during winter. Her favourites are the really dark-coloured lipsticks such as plum, brown, wine red, etc. Her preference for brands changes from time to time. But her all time favourite brand is Mac that she keeps going back to.

Kona isn't a big fan of following new trends every season. She tries to create looks that make her feel comfortable and go with her personality. However, she loves to experiment with her hair and tries a new hairstyle every now and then. For example, right now she is huge fan of the side part which she hadn't previously done.

Among accessories, her favourite is the watch. She has a rather large collection of watches and tries to collect watches from different brands and places all the time. She also sometimes styles her looks based on her favourite watches. And she makes sure to never leave the house without a stylish watch on her wrist.

For her shows, she usually trusts her stylist with her clothes. However, she makes sure that the clothes go with her personality. For winter, she usually likes wearing velvet dresses for shows as they are both comfortable and keep her warm and toasty while entertaining thousands of people.
