

INFRASTRUCTURE

TO LIFT PEOPLE OUT OF POVERTY

Summit Group shares its success with the people through development of the community and the environment, by implementing vast infrastructure development projects all over the country. Our projects include power plants which add more than 1,450 MW of electricity to the national grid, Nationwide Telecommunication Transmission Network (NTTN) service which provides an aggregated fibre optic network reach of more than 30,000 km to 300+ Upazillas, oil and shipping services with tanker vessels which are engaged in import and supply of liquid fuel to power plants, off-dock ports which provide services including Inland Container Depots (ICD) and Container Freight Station (CFS), as well as an IT-park developing a total of 91 acres of land for hi-tech industries at Kaliakoir and many other projects which enable us to grow and implement innovative and pioneering ideas to build the country's infrastructure, empowering the people of Bangladesh to march towards the dream of building a 'Golden Bengal'.
