

The power to do more

RAM WARS

TOP 6 SMARTPHONES WITH 6GB RAM

The word RAM stands for Random Access Memory. As the name suggest, it stores frequently used programme instructions randomly to increase the general speed of a system. In fact it's an impressive way of boosting up a system. For smartphones now-a-days, it's an integral part. Without a decent sized RAM onboard your smartphones are surely going to slow down. Hence a 2Gigabytes or 3Gigabytes of RAM are almost regular for mid-range phones. And the high end ones? They have a whopping 4GB to 6GB RAM. If you are into gaming or 3D graphics intensive work they here are six smartphones with 6GB RAM that you should consider buying:

Gionee M2017

Why Buy: Unveiled this December, this phone comes loaded with some eye-brow raising specs. Powered with a 1.44GHz Octacore processor, the phone has 6GB RAM, 128GB ROM and 7000mAh battery. Monster, am I right? Goes on sale from March.
Price: Tk. 82-84,000/-

Xiaomi Mi Mix

Why Buy: Design wise we think Xiaomi Mi Mix is an amazing phone. Though the phone's front camera is positioned awkwardly, still we didn't mind much about it. The phone has a 256GB ROM and 6GB RAM coupled with a Snapdragon 821 processor. Feels futuristic. Highly recommended.
Price: 256GB Tk. 68-70,000/-

Asus ZenFone 3 Deluxe

Why Buy: ASUS ZenFone 3 Deluxe edition is the younger brethren of ASUS ZenFone 2 Deluxe edition. It comes with full metal body design and industry-leading specs. Powered with 6GB of RAM and new 23MP camera truly amount to a better phone.
Price: Tk. 42-45,000/-

Samsung Galaxy C9 Pro

Why Buy: Samsung Galaxy C9 Pro is more sort of a phablet, thanks to its 6-inch display. The Galaxy C9 powered by a Qualcomm Snapdragon 653 Octa-core 1.95GHz processor paired with a 6GB of RAM, and also a 64GB internal storage. Currently pre-booking going on.
Price: Tk. 49,900/-

OnePlus 3T

Why Buy: King of the budget phones, superb specs, incredible camera- front & rear, clutter free UI- do you even need anything more. Good battery life and will be getting frequent updates. If you are into amateur videography then optical image stabisation is a great add on that you will find in this phone.
Price: Tk. 39-42,000/-

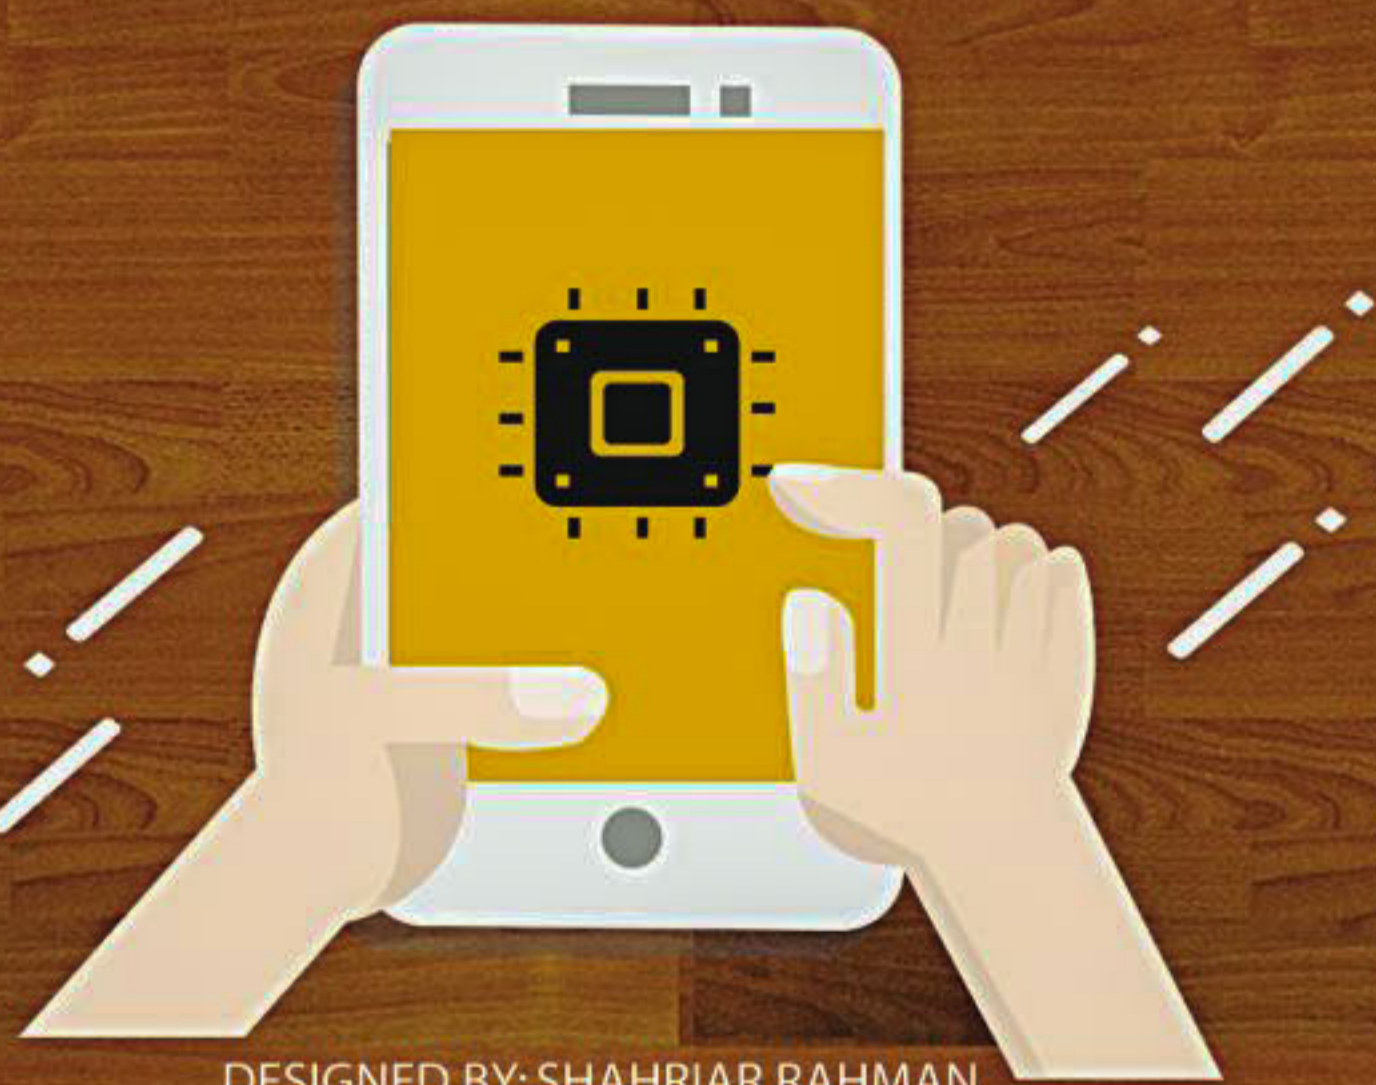

ZTE Nubia Z11

Why Buy: Stunning bezel-less display, fast Snapdragon 820 processor, excellent camera, fancy gesture controls using the bezel-less screen and quick charging battery - some features that make this phone a must have.
Price: Tk. 42-45,000/-

RAM ON YOUR SMARTPHONE

STUFF YOU NEED TO KNOW

DESIGNED BY: SHAHRIAR RAHMAN

When it comes to games and particularly 3D ones, RAM size does matter. Games consume large portion of RAM as they require a variety of files to be loaded to run.

Apps remain in the RAM after you are no longer using them and they have been shifted to background. The next time you use those apps they will be available for fast retrieval from RAM unless they have been removed.

Just a free app lying in the RAM does not consume your battery. If you are using an App like Facebook with notifications on, then it will tax your battery, because it will be interacting with the server.

Do you really need lots of RAM? Yes, if you play graphics intensive games or 3D apps. Or just for bragging rights. Else, you really should stick to phones less than 4 GB.

TECH HAPPENING

Samsung Electronics launches the 2017 line up of Air Conditioners in Bangladesh

Samsung Electronics has introduced the 2017 models of air conditioners in Bangladesh. The ACs come in two categories; Digital Inverter ACs with world's first 8-pole digital inverter compressor and non-inverter compressor. Samsung Electronics' newest addition to its home appliance range, the 8-pole digital compressor ACs have world's first 8 pole digital compressor technology that automatically adjusts power and ensures enhanced cooling experience than any other compressor in Bangladesh market. This innovative technology includes full HD filter that captures 99 % bacteria and allergen, hence provides hygienic and clean air. This 8-pole digital inverter compressor technology is unique for 43% faster cooling capability and 68% energy saving. The other regular non-inverter AC has the fastest cooling mode and 3 care air purification. The two different categories are available in three different capacity 1 ton , 1.5 ton and 2 ton at the price ranging from BDT 76,900 to BDT105,900 in digital inverter category and BDT 55,900 to BDT 82,900 in non-inverter category.
