

UPKEEP OF THE BALAYAGE

Most people are drawn to this technique because the maintenance is very low key. Most can go four to five months between each colour treatment. This is a technique that is evidently trending and is also soft on the hair.

UPKEEP OF THE OMBRE

Just like the galaxy highlight, the ombre also requires high maintenance so that the colours do not fade easily. The transition of colours between the top portion of the hair and the bottom must be aligned perfectly so that they look as natural as possible.
