inspector**

STAFF CORRESPONDENT, Ctg

A three-member team of Chittagong Metropolitan Police (CMP) is investigating the allegation against a police inspector who allegedly beat five persons including an on-duty sub-inspector in a drunken condition at a city hotel early Tuesday.

Inspector Mainul Islam Bhuyian was a former officer-in-charge (OC) of Sadarghat and Khulshi police stations in Chittagong city.

Now he is attached with the police lines after he was closed for another beating incident last year.

According to OC of Double Mooring Police Station AKM Mohiuddin Selim, on Tuesday around 3:15am a security guard of Hotel Saint Martin Ltd in Agrabad area informed on-duty Sub Inspector of the station Syed Alam that an OC had come to the hotel in a car.

As the SI approached, Inspector Mainul coming out of the car asked him why he was peeping through his car window. When the SI said he was deployed in the area, Mainul started verbally abusing him and threatened to sack him.

faults in a safety device that created more pressure than the supported capacity.

To investigate the incident, the Fire Service and Civil Defence formed a five-member probe committee on Tuesday. Akhtaruzzaman, a member of the committee, yesterday said they were looking for the boiler safety device (pressure relief valve).

"We will be able to know most of the reasons behind the explosion if we get the safety device," said Akhtaruzzaman, also the deputy assistant director of Gazipur fire service and civil defence.

Meanwhile, Rahenul Islam, additional district magistrate and chief of the eight-member fact-finding committee formed by Gazipur district administration on Monday night, yesterday said they had been investigating the incident on the basis of seven grounds -- five technical and two administrative.

They had talked to 14 people till Wednesday, he added. Prof Kamruzzaman of Dhaka University of Engineering and Technology (DUET) visited the spot on Wednesday to find out whether there were any technical faults.

He yesterday said many of the factory staff were giving wrong information to them. But after talking with several people, it was primarily learnt that the factory staff were trying to generate pressure by switching off the delivery valve.

"At one point, when it created more pressure, the boiler exploded," he added.
