

## FOR THE LOVE OF FISH

**A** five-day fish fair began in the city's Krishibid Institution Bangladesh, where around 37 stalls attracted hundreds of fish lovers of different ages from across the country. While highlighting the country's love for fish, the fair also informed the visitors about fish species and methods of rearing them. Some stalls showcased various species of fish preserved in glass jars and even live fish and others showed how to make the ideal fish farm. Tools used for fishing were also on display. Some of the freshest fish were on sale during the fair. To generate further interest, visitors were treated to demonstrations on how to rear their favourite fish in aquaria.
