

DECOR

LIGHTING SELECTION

As the primary spot for precision tasks like applying makeup and shaving, a bathroom needs to have ample vanity lights. Standout light fixtures for the walls and ceilings can be an oomph factor in your bathrooms. It changes the appearance almost instantaneously. Also, allow the entry of natural air into your bathrooms to give it a bright, airy feel. If that is not an option, do not forget to install exhausts to give you a humidity free, dry atmosphere.

RESTROOM DÉCOR

If there is one room that deserves a little extra luxury, it is the bathroom. Invest in vases, good quality porcelain for toothbrushes, bath rugs, shower curtains, towels, towel bars and rings, shower heads and faucets, toilet paper holders, makeup and shaving mirrors, and towel warmers.

Make smart use of space inside cupboards to keep the vanity space clear and clean. Install a Lazy Susan inside the cupboard to make organising easier. Décor is all in the details. Use storage jars and containers to de-clutter and embellish at the same time.

ADD SOME GREENERY

Bathrooms deserve to be decorated with lush greenery just like every other room in the house – but it can be tricky to find a plant that thrives here. Low light, high humidity, and warm temperatures mean only certain houseplants will flourish. So, choose accordingly. You can transform your bathroom and it has an added advantage of naturally deodorising your space.

TIPS

The charm of white walls

The environment of a room not only expresses its vibe but it also expresses a part of you through it. Different rooms have different functional aspect and decorating each room accordingly is an individualistic choice. However, choosing the right colour for rooms can be a tricky decision. While many might think that white is a blunt colour, it so happens that white itself has many sophisticated shades which creates an aesthetic effect.

Closet Mix, Water Chestnut, Garage Mix, Bone White and Oatmeal shades are mentionable white colours that have a hint of individuality in them and create a more visual output, which is rather soothing to look at.

On the other hand, pale smoke, Victorian pewter, silver charm, moth gray are a bit greyish in tint, which can be painted in one or two corners of the room. To brighten up a small room shades such as cream, egg-shell, ivory, alabaster, coconut are beautiful and worth consideration. For larger rooms linen white, Du Jour, white dove, Hogs Bristle, Quarter, white on white are impressive colours that your wall deserves.

If you want to colour your walls differently it is wise to colour one or two parts of your room because colouring the walls entirely blue, red or orange makes the room smaller and more difficult to arrange furniture that complements the room colour.

The colours on your walls is one of the most essential part to consider and while there are many shades to choose from, you can always follow your heart and your day to day mood because your personal preference comes first!
