STOP TAKING KIDS TO MOVIES WITH ADULT CONTENT!

"Adult content in movies: graphic violence, profanity, overtly sexual dialogue, [nudity is on the menu too, but explicit nakedness is usually censored before movies can make it to big screens in Bangladesh]. Examples of movies with adult content released in Bangladesh: *Deadpool*, *Logan*, and the most recent, *Blade Runner 2049*. And I've heard babies/children cry during all three at movie theatres in Dhaka.

Do the adults bringing in kids not understand the concept of "adult content"? Does the movie theatre staff not care? If you're a responsible adult with IQ higher than cabbage, you know that the graphic content will scar the kids; during a 2+ hour movie a kid below 5 will definitely be irritated and cry, ruining your movie experience, and most importantly, ruining the movie experience for others who have paid good money for the tickets.

Be a decent human person and think of the children.
