

Indomitable

The only folks I envy are those who have to commute long distances multiple times a day for work and then CHOOSE to have a social life, requiring further commutes, sitting in Dhaka traffic at various points of the day. Of course, I don't envy the sitting in traffic bit. I like 1 prayer for y'all.

What I envy is your indomitable zest for life, this endless "tel" you have that keeps you going. You are the real OGs. I wish I had your superpower.

P.S. Folks living in Mirpur, Uttara, Boshundhora, Jatrabari who do this get bonus points. You have achieved Nirvana.

– Karim Waheed, tired commuter

THIS WEEK'S HORRORSCOPE

ARIES

Who likes melted ice cream anyway?

TAURUS

Do you know why llamas are so fascinating?

GEMINI

What do horses play at parties? Just Prance.

CANCER

I really wish you'd stop stockpiling chocolates in your drawer.

LEO

A cacophony of crows and cats await you today.

VIRGO

If the Earth is flat, how does it revolve around the Sun?

LIBRA

Stop using stripes everywhere!

SCORPIO

Push me to the edge, all my friends are bread.

SAGITTARIUS

Get a camel. Name him Kamal.

CAPRICORN

I'm not really sure what you're going to do with all that tartar sauce.

AQUARIUS

Be sure to check your messages for discounts to stuff you might buy in the future.

PISCES

Try not to eat too much cake today.

APP REVIEW

Professional-grade editing in your pocket

SHAHRIKH IKHTEAR

Platforms: iOS, Android

If you're like me, then you prefer a comparatively nuanced approach to photo-editing as opposed to cranking up the HDR slider on other photo-editing apps. Adobe Lightroom CC for mobile is the perfect companion to truly bring out the best in your photos.

For starters, the app has your basic exposure, contrast, highlights, and shadows settings. But what it offers beyond that is what makes it so special. Lightroom allows you to adjust hue of

your highlights and shadows quite easily without hassle. Not to mention the Clarity and Dehaze features, which really allow your subjects to pop without having that "filtered" look.

If you upgrade to the premium version, you can selectively adjust parts of your photo in accordance with gradient lines or circles. This allows you to really play around creatively, resulting in very unique photo edits. One of the most underrated features is being able to sync all photos with your Adobe account. So you'll have access to everything on every device that has Lightroom installed.
