Europe brings on charm and blue skies to lure Chinese tourists

AFP, Venice

Chinese tourists are big spenders and with the numbers visiting Europe set to soar by nearly 70 percent over the next five years, the countries of the Old Continent are rolling out the red carpet to make the guests feel welcome.

A total 12.4 million Chinese, mostly in guided tour groups, came to Europe in 2017, according to the European Travel Commission. And the Chinese Tourism Academy (CTA) is expecting the number to reach 20.8 million by 2022.

"A few years ago, the Chinese came to Europe solely to do some shopping. Now, they're increasingly keen to get know the culture and the countryside," CTA president Dai Bin told AFP, speaking in Venice, at the launch of the year of tourism between the EU and China.

Festivals, cooking courses... "they want to have personal experiences and visit areas where they don't see any other Chinese," said ETC's executive director, Eduardo Santander.

"They like the cuisine, the music, the blue skies... most of them come from the coast, where pollution is extremely high," Santander said.

And some were surprised that they can "breathe without coughing," he added.

China is the world's biggest market for foreign tourism -- with 129 million Chinese

holidaymakers travelling abroad, they account for one fifth of the total number of tourists globally.

And they spend more than twice the amount that, say, US tourists do -- \$261 billion in 2016 compared with \$123 billion.

Small gestures can go a long way towards making Chinese tourists feel more at ease in Europe, said Jacopo Sertoli, head of Welcome Chinese, a body that awards certificates to tourism companies catering for Chinese customers.

"You can make them very happy by offering them a glass of hot water," he said, noting most Chinese families drink water at that temperature rather than cold.

Chinese language television stations and good wifi in hotel rooms are a good idea while payment methods favoured by the Chinese, such as UnionPay, the only credit card issuer in China, WeChatPay or Alipay are a must.

CTA chief Dai Bin said Europe should reduce the red tape for its Chinese visitors.

"We hope Europe will make it easier for Chinese to get a visa," he said.

"In a number of eastern European countries, for example, it's easy. But it's very difficult in others. And when Chinese tourists visit Europe, they want to visit several countries, not just one," Dai Bin said.

By reciprocity, China would become

"more flexible when granting visas and Europeans can stay in Beijing or Shanghai for 144 hours -- or six days -- without a visa," he promised.

According to ETC data, France is the number one desired destination in Europe for Chinese tourists, with 61 percent of visitors hoping to go there, followed by Germany with 37 percent and Italy with 28 percent.

Nevertheless, that picture has started to change in recent years, and travel to eastern Europe is booming, not least because of the easier allocation of visas and the increased availability of cheap flights. The string of terrorist attacks in France and Germany in recent years is also a factor.

In 2016, the number of Chinese tourists visiting Serbia, for example, rose by 173 percent, and numbers were up by nearly 90 percent in Montenegro.

But while "the Chinese are very alert to questions of security, they tend to forget more easily than other tourists," Santander said.

Popular for perceivedly having deep pockets -- a result of the Chinese tradition of giving presents -- Chinese visitors haven't always enjoyed a reputation for their savoir-vivre.

But that's an image which China is itself keen to remedy, with "some tourist agencies offering lessons to customers before they go to Europe," said CTA president Dai Bin.

India sends tax notices to cryptocurrency investors as trading hits \$3.5b

REUTERS, New Delhi

India has sent tax notices to tens of thousands of people dealing in cryptocurrency after a nationwide survey showed more than \$3.5 billion worth of transactions have been conducted over a 17-month period, the income tax department said.

Tech-savvy young investors, real estate players and jewelers are among those invested in bitcoin and other virtual currencies, tax officials told Reuters after gathering data from nine exchanges in Mumbai, Delhi, Bengaluru and Pune.

Governments around the world are grappling with how to regulate cryptocurrency trading, and policymakers are expected to discuss the matter at a G20 summit in Argentina in March.

The Indian government has issued repeated warnings against digital currency investments, saying these were like "Ponzi schemes" that offer unusually high returns to early investors. But it has not so far imposed curbs on an industry estimated to be adding 200,000 users in India every month.

BR Balakrishnan, a director general of investigations at the income tax department in the southern state of Karnataka, said notices were sent following the survey to assess the penetration and patterns of virtual currency trade. "We cannot turn a blind eye. It would have been disastrous to wait until the final verdict was out on its legality," he told Reuters.

The tax department has asked people dealing in bitcoin and other virtual currencies such as ethereum and ripple to pay tax on capital gains. They have also asked for details about their total holdings and the source of funds in the tax notice seen by Reuters.

"We found that investors were not reflecting it on their tax returns and in many cases, the investment was not accounted for," Balakrishnan said.

Bitcoin, the world's biggest cryptocurrency, soared more than 1,700 percent last year, hitting a record high just shy of \$20,000 as institutional and retail investors around the world snapped up the virtual currency.

Its huge gains have attracted the attention of global regulators tasked with protecting investors from fraud.

In recent weeks, Japan and China have made noises about a regulatory crackdown, while South Korean policymakers said they were considering shutting down domestic virtual currency exchanges.

An Indian finance ministry official said a federal committee was looking into the possibility of imposing restrictions on virtual currencies and that eventually parliament would have to legislate a regulatory regime.

Officials at Zebpay, India's leading bitcoin exchange, said the industry was adding near 200,000 users every month with an estimated trade volume of about 20 billion Indian rupees (\$315 million).

"Many of our customers are treating digital currency like gold," said Zebpay co-founder Saurabh Agarwal.

Aman Kalra, marketing head of Coinsecure, a bitcoin exchange in New Delhi, said more than 150 bitcoins were changing hands every week through its platform. The company has 100,000 registered users and is now launching a platform to sell ethereum and other digital currencies.
