# Femme fatale

Frida Kahlo, the famed Mexican artist, proved to the world that style is anything you choose to wear and feel comfortable in. She loved sporting the signature unibrow and moustache, at a time when female facial hair was regarded ugly and unwomanly.

She sported hairstyles considered too loud and atrocious, but later garnered a cult following. At Star Lifestyle, we have tried to recreate her bold hairstyles — in an avalanche of colours, oversized flowers, luxurious satins, and soulful tie-dyes! Come fall in love with Star Lifestyle's extravagant feminine hairstyles, inspired by none other than Frida Kahlo.
