

WEARING neon

The arrival of spring brings with it a fresh splash of colours as the seasonal flora takes over the otherwise monotonous winter surrounding. Inspired by this revival of life, spring fashion has always been one of bolder shades of pink, orange, and yellow. Taking things up a notch, spring this year brings back a flamboyant trend of the 80s. Neon shades are back, and with ven-

geance!

Enough with boring greys and blacks. Magentas, electric blues, and bright yellows have already hit the runways worldwide and it is only a matter of time until they strut into our wardrobes.
