

History, Politics, Drama

Themistocles was a non-aristocratic politician in ancient Athens. In the run up to the second Persian (present day Iran) invasion, he became the most prominent politician in Greece. In 483 BC, he convinced the Athenians to build a fleet of 200 triremes (warships); these would prove crucial in the conflict with Persia, the greatest superpower of that time. In fact, it wouldn't be an overstatement to say that it was Themistocles' strategies that helped Greece win that war. Over the years, however, Themistocles' perceived arrogance began to alienate him from the Athenians. In 471 BC, he was ostracised, and went into exile, entering the service of the Persian king, Artaxerxes I. Themistocles died in Persia.

History has more drama than Star Jolsha and Zee Bangla. Get into it.

APP REVIEW

EVERNOTE

STREAMLINED NOTE-TAKING

SHAH TAZRIAN ASHRAFI

Platforms: Android, iOS.

Managing physical notes is tough at times as there are many chances of losing them or not being able to access them immediately when necessary. If you're someone who finds it difficult to keep track of notes, then Evernote is for you.

Evernote comes with a minimalistic interface and lets you save notes in various forms— photo, text, attachment, audio clip, reminder, and even handwriting. It allows you to make notebooks and save notes within the notebooks. Plus, there are no chances of losing or disorganising

them as it has syncing and searching options, which help you avoid hassles and save time. The best thing about Evernote is that you can make different notes for different subjects without cramming them all in one place and even view as you prefer. If you're concerned about the privacy of your notes while sharing with other people, you can save them with a pass-code lock. The app also allows you to set up widgets on home-screen for the sake of saving time while in hurry.

All in all, this app is everything a free note taking app should be. Accessing notes without an internet connection is possible, but for that, you have to upgrade to the premium version.
