

Be bold with A CAUSE

As the sun beats down this year make sure to grab one of Afsana Ferdousi's comfortably, light, eco-couture kurtis, tops, or panjabis. She uses neutral tones for her colour scheme, making it the best pick to fight against the sweltering heat. When asked about the process behind each of her lines, she said, "Honestly every clothing line that I do is like narrating a story. I did a recent fashion show focusing on the theme of Patachitra, where I narrated the chronological history of khaadi till present day — through a song I had written myself and hand paint and embroidery in my designs."
