

## COVER STORY

# Bring the Bahamas home

With the end of the year coming in a rush; we can't help but imagine palm trees, long stretches of sandy beaches, cyan-blue ocean, waves and sipping on mocktails endlessly while relaxing on comfy plantation sofas!

For some of us, this may just be an imagination that's difficult to realise, since our busy schedules will not allow us to pander to such an escapade.

But it surely does not stop us from bringing in the resort life closer to our homes. "If we can't go to the beach, let's bring it home," we say!

Savvy additions of classic furniture such as canes and a selection of carefully curated interior decoration pieces can almost do that unimaginable. You'd perhaps never feel like leaving home again!

Having a hard time believing? Let us help...

Close your eyes again, and imagine walking into a room with a light breeze coming in from the wooden shutters and sheer curtains. Towards the left is the sea grass furniture aesthetically placed in combination with solid wood slipper chairs! A single rattan table lamp is aptly placed on the side table giving out a refreshing light, subtle to the moods. To the right, there's few oversized banana plants set flawlessly in a beautiful ceramic ornate pot bringing in the touch of Bahamas, directly to your living room.
