

# THE SECOND PHASE

Ideas aren't that precious. We come up with a good idea every time we visit the washroom, but when you stop to think how many of these ideas we act on, the answer is often depressing. You'll be told by a lot of people that all you need to pull yourself out of this rut is simply willpower, a "can-do attitude", and to just stop being lazy. While that may be true in some cases, like most things, it's not that simple most of the time.

Motivation comes at a price much higher than words. If you have lacked motivation for some time now, the problem is probably more personal than many would want to admit. The human mind needs a combination of catalysts to get itself moving when it's at rest. While some of those catalysts may be psychological, many of them are related to the condition of people and things that surround you in the physical space. It's difficult to admit when things like these are wrong with our lives but often times, these are what hold us back.

We have enough resources around these days to arm us with the knowledge to realise most of our crazy ideas. This week's cover story is one such resource. It's important that we do our best to make most of these resources as the world waits for us to weave our magic.

## APP REVIEW

# SLING YOURSELF INTO ORBIT

TAQDIRUL ISLAM

Platforms: iOS, Android

A game where you drive around in a car is not what you'd think about when you want a game to play when you're standing in queue wondering what's taking them so long. "Sling Drift" is a different kind of game though, it's a game where a car goes around an endless track and all you have to do is tap the screen and the car slings itself around turns and U-turns with vary-

ing levels of precision. Apparently, that's all it takes to hook a human mind and have them play the same game for the last three weeks.

The game gets more difficult as you progress as the speed of the car increases and the roads get narrower. You can collect coins and use them to buy different vehicles, an F1 car, a shiny sports car, and if you feel like it, even a tank! Give this game a download if you're looking to occupy your hands when you've got nothing to do, it does a hell of a job at that.
