

IT'S NOT LOOKING GOOD

It's fascinating that around the world, there are still people who deny climate change. For us, living in the largest delta in the world, threatened by Mother Nature with increasing frequency, it's not quite that simple to run away from this reality. But even as children are taught in school about the greenhouse effect, as grownups discuss the causes and effects and the politics of climate change, as a UN report warns the world that it has only 12 years to limit temperature rise to 1.5 degrees Celsius or face irrecoverable damage, fossil fuel keeps getting consumed around the world and no considerable headway is made with renewable energy.

This week's issue of SHOUT has been made with climate change in mind. It's gotten to the point where most of us are reduced to apathetic shrugs symbolising that defeat has been conceded. It's gotten to the point where we *really* need to get our act together and fight this.

APP REVIEW

MUSICANA A POOR MAN'S SPOTIFY

AAQIB HASIB

Platform: Android

The future of music, for general listeners, is in streaming. With the rise of platforms like Spotify and Apple Music, storing music on ones devices has become a thing of the past.

While these options are great, many of them are not yet available in Bangladesh nor can everyone afford to

pay a monthly subscription for using these apps. That's where Musicana comes in. Musicana is free app on the Play Store that really gives you the best of both worlds. It not only allows you to stream music, but also lets you access your local music files seamlessly.

Coupled with a beautifully designed and minimalistic user interface, Musicana is truly a treat for music lovers.
