

MEET THE TREE DOCTORS

A pick-up van with a stall-like structure fashioned in the back stands before a signboard which reads: "Plant illness! Come to the Mobile Plant Hospital". Inside the stall, sit two men wearing white coats just like doctors do. Meet the doctors for your plants. Recently, a "mobile tree hospital" has been going around the city providing free care for plants. The care includes medicines and treatment, along with the needed love. The service goes door to door providing plants with the care they need. The initiative was taken by Green Savers Association, assisted by Dhaka North City Corporation and Square Pharmaceuticals. The doctors are available from 10:00am till 5:00pm. The stall also includes fun quizzes for young children, all going towards them being educated for a greener future!
